Infrasound Monitoring for Atmospheric Studies Alexis Le Pichon, Elisabeth Blanc, Alain Hauchecorne, 2010-01-19 The use of infrasound to monitor the atmosphere has, like infrasound itself, gone largely unheard of through the years. But it has many applications, and it is about time that a book is being devoted to this fascinating subject. Our own involvement with infrasound occurred as graduate students of Prof. William Donn, who had established an infrasound array at the Lamont-Doherty Geological Observatory (now the Lamont-Doherty Earth Observatory) of Columbia University. It was a natural outgrowth of another major activity at Lamont, using seismic waves to explore the Earth's interior. Both the atmosphere and the solid Earth feature velocity (seismic or acoustic) gradients in the vertical which act to refract the respective waves. The refraction in turn allows one to calculate the respective background structure in these mediums, indirectly exploring locations that are hard to observe otherwise. Monitoring these signals also allows one to discover various phenomena, both natural and man-made (some of which have military applications).

Pre-Incident Indicators of Terrorist Incidents Brent L. Smith, 2011 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning

process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Trauma-Informed Healthcare Approaches Megan R. Gerber,2019-04-12 Interpersonal trauma is ubiquitous and its impact on health has long been understood. Recently, however, the critical importance of this issue has been magnified in the public eye. A burgeoning literature has demonstrated the impact of traumatic experiences on mental and physical health, and many potential interventions have been proposed. This volume serves as a detailed, practical guide to trauma-informed care. Chapters provide guidance to both healthcare providers and organizations on strategies for adopting, implementing and sustaining principles of trauma-informed care. The first section maps out the scope of the problem and defines specific types of interpersonal trauma. The

authors then turn to discussion of adaptations to care for special populations, including sexual and gender minority persons, immigrants, male survivors and Veterans as these groups often require more nuanced approaches. Caring for trauma-exposed patients can place a strain on clinicians, and approaches for fostering resilience and promoting wellness among staff are presented next. Finally, the book covers concrete trauma-informed clinical strategies in adult and pediatric primary care, and women's health/maternity care settings. Using a case-based approach, the expert authors provide real-world front line examples of the impact trauma-informed clinical approaches have on patients' quality of life, sense of comfort, and trust. Case examples are discussed along with evidence based approaches that demonstrate improved health outcomes. Written by experts in the field, Trauma-Informed Healthcare Approaches is the definitive resource for improving quality care for patients who have experienced trauma.

Problem Determination for WebSphere for z/OS Rica Weller, Cleberson Calefi, Per Fremstad, Keith Jabcuga, Suresh Maddukuri, Kiet Nguyen, Robyn Nostalg, Rajesh Pericherla, 2006 IBM WebSphere Application Server for z/OS V6 is a complex product made up of many components. This IBM Redbooks publication focuses on the problems that you can experience with WebSphere for z/OS. It is intended for system programmers and administrators who need to identify, analyze, and fix problems efficiently so that they can deliver good support for the WebSphere environment. In Part 1, we provide an overview of problem determination methodology, what skills you need, where to find information about related topics, and how to communicate with IBM when a problem occurs. In Part 2, we describe the most common problem symptoms. Flow charts guide you through the

problem analysis process step by step. Individual tasks and questions help you filter out irrelevant facts and find the problem area, so that you can identify the type, source, cause, and possibly a solution. In Part 3, we identify possible problem areas and arrange them into four phases that correspond with WebSphere for z/OS life cycle stages. We explain how to analyze the problems and provide valuable hints and tips for avoiding them. In Part 4, we provide means and tools for problem determination such as commands, logs, dumps, traces, and diagnostic tools. We describe other tools that can ease the day-to-day tasks and prevent problems. We also explain where to get these tools, show you how to use them, and provide examples. Please note that the additional material referenced in the text is not available from IBM.

A Practical Guide to the Evaluation of Child Physical Abuse and Neglect Angelo P. Giardino,Michelle A. Lyn,Eileen R. Giardino,2010-06-09 As we near the 50th anniversary of the landmark article by C. Henry Kempe and his colleagues entitled “The Battered Child Syndrome”, which ushered in the modern era of professional attention by pediatricians and other child health professionals, we have reason for both celebration and concern. We can take heart that over the recent ve decades, a great deal of professional attention focused on the problem of child abuse and neglect. In every state of the country, there are mandatory repo- ing laws that require nurses, physicians, and social workers to report suspicions of maltreatment to the appropriate authorities for investigation. The act of repo- ing provides legal immunity to the reporter except when performed in bad faith. Progress in understanding the factors that place children at risk for harm

from physical abuse and neglect now permits prevention and intervention. The peer-reviewed literature dealing with child abuse and neglect has proliferated with high quality work being done and reported on the many dimensions related to the epidemiology, mechanism, treatment, and prognosis of child maltreatment. Efforts are being directed toward developing an evidence-based approach to the prevention of child abuse and neglect. These are some of the positives. However, negatives exist and remain reasons for concern. Despite a tremendous amount of attention to the problem of maltreatment, there are at least 3 million reports of suspected child abuse and neglect made annually, with nearly 1 million cases being substantiated.

Climate Impacts on the Baltic Sea: From Science to Policy Marcus Reckermann, 2014-05-09 The Baltic Sea area is an old cultural landscape with a well developed international framework for monitoring, assessing and managing its marine ecosystems. It provides a good case study for other regions where such management is being set up. The chapters in this book are based on lectures given at a summer school on the Baltic Sea island of Bornholm in the summer of 2009. They cover a range of topics, spanning from detailed descriptions of political agreements that protect the marine environment, to basic modelling instructions, to an assessment of the possible impacts of climate change on the marine ecosystem, to a reflection on the role of climate scientists and their responsibility in society. This interdisciplinary book is primarily directed

at students and lecturers of the environmental disciplines to provide an overview of the possible impacts of climate change on the Baltic Sea. It is also intended to serve as a background reference for scientists and policy makers, both for the Baltic Sea area and more generally. The book is a contribution to the BALTEX programme and to the BONUS+ projects ECOSUPPORT and Baltic-C.
