The State of the World's Children 2019 United Nations, 2019-10-15 This report examines nutrition, providing a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades, around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity, which affects 38 million children. All these forms of malnutrition threaten children's development, while obesity is creating a lifelong legacy of disease. At the heart of this evolving challenge is a global shift towards modern diets that do not meet children's nutritional requirements. The report provides unique data and analysis of malnutrition in the 21st century and outlines recommendations to put children's needs at the heart of global and national food systems.

World Report on Ageing and Health World Health Organization, 2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future.

A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

Global Economic Prospects, June 2021 World Bank, 2021-08-03 The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Prominent among the necessary

policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

Women's Health Research Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Women's Health Research, 2010-10-27 Even though slightly over half of the U.S. population is female, medical research historically has neglected the health needs of women. However, over the past two decades, there have been major changes in government support of women's health research-in policies, regulations, and the organization of research efforts. To assess the impact of these changes, Congress directed the Department of Health and Human Services (HHS) to ask the IOM to examine what has been learned from that research and how well it has been put into practice as well as communicated to both providers and women. Women's Health Research finds that women's health research has contributed to significant progress over the past 20 years in lessening the burden of disease and reducing deaths from some conditions, while other conditions have seen only moderate change or even little or no change. Gaps remain, both in research areas and in the application of results to benefit women in general and across multiple population groups. Given the many and significant roles women play in our society, maintaining support for women's health research and enhancing its impact are not only in the interest of women, they are in the interest of us all.

Children as Readers in Children's Literature Evelyn Arizpe, Vivienne Smith, 2015-10-05

We are fascinated by text and we are fascinated by reading. Is this because we are in a time of textual change? Given that young people always seem to be in the vanguard of technological change, questions about what and how they read are the subject of intense debate. *Children as Readers in Children's Literature* explores these questions by looking at the literature that is written for children and young people to see what it tells us about them as readers. The contributors to this book are a group of distinguished children's literature scholars, literacy and media specialists who contemplate the multiple images of children as readers and how they reflect the power and purpose of texts and literacy. Contributors to this wide-ranging text consider: How books shape the readers we become Cognitive and affective responses to representation of books and reading The relationship between love-stories and reading as a cultural activity Reading as 'Protection and Enlightenment' Picturebooks as stage sets for acts of reading Readers' perceptions of a writer This portrayal of books and reading also reveals adults' beliefs about childhood and literacy and how they are changing. It is a theme of crucial significance in the shaping of future generations of readers given these beliefs influence not only ideas about the teaching of literature but also about the role of digital technologies. This text is a must-read for any individual interested in the importance of keeping literature alive through reading.

Violence, Trauma, and Trauma Surgery Mark Siegler,Selwyn O. Rogers Jr.,2020-02-27 This unique and innovative title offers a comprehensive exploration of the intersection of ethics, violence, trauma, and trauma surgery. Underscoring that the causes of violence include a wide range of socioeconomic factors, including poverty and the lack of economic opportunity, and that violence often occurs in impoverished and underserved communities, various authors from a wide range of disciplines outline how intentional violence toward another person is multidimensional and complex. Many of the authors use Chicago as a framework for their chapter discussion, but there are similarities in many urban settings throughout the United States and abroad. Part I of the book, Ethical Issues Related to Violence, includes seven chapters that examine ethical issues related to violence. Each of these chapters discusses a different but intersecting aspect of how violence challenges ethical standards in medicine and health. Part II, Ethical Issues

Related to Trauma and Trauma Surgery, offers eight chapters that address various aspects of ethical issues related to trauma and trauma surgery. Part III, Additional Concerns Relating to Violence and Trauma, describe a series of issues relating to violence and trauma, including surgical procedures, psychological distress, and geographic disparities in access to trauma care. Developed by nationally renowned thought leaders in the field, Violence, Trauma, and Trauma Surgery is a major and novel contribution to the clinical literature and will be of great interest to all physicians, clinicians, researchers, social scientists, students, policymakers, hospital administrators and community leaders concerned with understanding and improving outcomes relating to violence, trauma, and trauma surgery.

Hydrocarbons produce raw crude oil waste of around 600,000 metric tons per annum, with a range of uncertainty of 200,000 metric tons per year. The various chapters in this book focus on approaches to reduce these wastes through the application of potential microbes, in a process called bioremediation. The book is a one-stop reference resource on the methods, mechanisms and application of the bio-composites, in the laboratory and field. Focusing on resolving a very pressing environmental issue, it not only provides details of existing challenges, but also offers deeper insights into the possibility of solving problems using hydrocarbon bioremediation.
