REDD, Forest Governance and Rural Livelihoods Oliver Springate-Baginski,Eva Wollenberg,2010-01-01 Experiences from incentive-based forest management are examined for their effects on the livelihoods of local communities. In the second section, country case studies provide a snapshot of REDD developments to date and identify design features for REDD that would support benefits for forest communities.

State of the World's Children UNICEF.,2009 On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report The State of the World's Children to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children.

The New Codebreakers Peter Y. A. Ryan,David Naccache,Jean-Jacques Quisquater,2016-03-17 This Festschrift volume is published in honor of David Kahn and is the outcome of a Fest held in Luxembourg in 2010 on the occasion of David Kahn's 80th birthday. The title of this book leans on the title of a serious history of cryptology named "The Codebreakers", written by David Kahn and published in 1967. This book contains 35 talks dealing with cryptography as a whole. They are organized in topical section named: history; technology – past, present, future; efficient cryptographic implementations; treachery and perfidy; information security; cryptanalysis; side-channel attacks; randomness embedded system security; public-key cryptography; and models and protocols.

Artificial Intelligence Research Edgar Jembere,Aurora J. Gerber,Serestina Viriri,Anban Pillay,2022-01-29 This book constitutes the refereed proceedings of the Second Southern African Conference on Artificial Intelligence Research, SACAIR 2021, held in Durban, South Africa, in December 2021. Due to the COVID-19 pandemic the SACAIR 2021 was held online. The 22 papers presented were thoroughly reviewed and selected from the 70 submissions. They are organized on the topical sections on AI in the humanities and society, AI in and for information systems, computer vision and image processing, deep learning, knowledge representation and reasoning, machine learning, philosophy and ethics of AI.

The State of the World's Children 2019 United Nations,2019-10-15 This report examines nutrition, providing a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades, around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity, which affects 38 million children. All these forms of malnutrition threaten children's development, while obesity is creating a lifelong legacy of disease. At the heart of this evolving challenge is a global shift towards modern diets that do not meet children's nutritional requirements. The report provides unique data and analysis of malnutrition in the 21st century and outlines recommendations to put children's needs at the heart of global and national food systems.

Early Childhood Intervention Hanan Sukkar,Carl J. Dunst,Jane Kirkby,2016-12-01 Early childhood is considered a critical but often vulnerable period in a child's development where early identification and intervention can be crucial for improving children's developmental outcomes. Systems and family-centred perspectives are vital to support families and build their capacities to lead normalized lives with improved family quality of life. This book explores the family-centred practices and systems factors which influence families' experiences raising children with complex needs. It also considers the ways in which professionals can work with families to build and support parent and child competence. Conceptual and practical work from Australia, Canada, Europe and the United States present descriptions of and implications for different family system frameworks and early-childhood programs. Contributors in this edited volume bring together contemporary information that bridges the research to practice gap in supporting families of young children with disabilities or delays. Chapters include: Early Intervention for Young Children with Developmental Delays: Contributions of the Developmental Systems Approach Family Composition and Family Needs in Australia: What Makes a Family? Working with Families in Early Childhood Intervention: Family-Centred Practices in an Individualised Funding Landscape Family Systems and Family-Centred Intervention Practices in Portugal and Spain: Iberian Reflections on Early Childhood Intervention This book will attract the attention scholars of Parenting and Families; Child Development and Childcare.

Team Geek Brian W. Fitzpatrick,Ben Collins-Sussman,2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human factors have as much influence on the outcome as technical factors. Even if you've spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobb's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

Moving to Linux Marcel Gagné,2004 This is not a book for techies! It's a book for people like you: people who write documents, create spreadsheets, surf the Web, send emails, listen to CDs, play games, and want to do it simply in Linux, without becoming technical experts! Convert your Windows PC to a Linux system that does more for less money, one step at a time.

Moving from Windows to Linux Chuck Easttom,Bryan Hoff,2006 Moving from Windows to Linux, Second Edition is a step-by-step walk through the transition from Windows to Linux. This completely updated version of the best-selling book teaches Windows users how to make their PC a Linux PC. It covers the latest in Linux distributions, and provides Windows users with the information they need to choose the one that will best suit their needs. From there, the book works through the transition from Windows to SuSE Linux 9.3, leveraging what Windows users already know, and applying that knowledge to Linux. The transition from applications such as Microsoft Word, Microsoft Office and Adobe Photoshop to their Linux counterparts KWord, Open Office, and GIMP are treated thoroughly and made easy. Real-world, hands-on examples and troubleshooting problems are also included. After reading through the book, any knowledgeable user of Windows will be able to set up, maintain, and utilize all aspects of a Linux PC.

Linux in a Nutshell Ellen Siever,Aaron Weber,Stephen Figgins,Robert Love,Arnold Robbins,2005 Over the last few years, Linux has grown both as an operating system and a tool for personal and business use. Simultaneously becoming more user friendly and more powerful as a back-end system, Linux has achieved new plateaus: the newer filesystems have solidified, new commands and tools have appeared and become standard, and the desktop--including new desktop environments--have proved to be viable, stable, and readily accessible to even those who don't consider themselves computer gurus. Whether you're using Linux for personal software projects, for a small office

or home office (often termed the SOHO environment), to provide services to a small group of colleagues, or to administer a site responsible for millions of email and web connections each day, you need quick access to information on a wide range of tools. This book covers all aspects of administering and making effective use of Linux systems. Among its topics are booting, package management, and revision control. But foremost in Linux in a Nutshell are the utilities and commands that make Linux one of the most powerful and flexible systems available. Now in its fifth edition, Linux in a Nutshell brings users up-to-date with the current state of Linux. Considered by many to be the most complete and authoritative command reference for Linux available, the book covers all substantial user, programming, administration, and networking commands for the most common Linux distributions. Comprehensive but concise, the fifth edition has been updated to cover new features of major Linux distributions. Configuration information for the rapidly growing commercial network services and community update services is one of the subjects covered for the first time. But that's just the beginning. The book covers editors, shells, and LILO and GRUB boot options. There's also coverage of Apache, Samba, Postfix, sendmail, CVS, Subversion, Emacs, vi, sed, gawk, and much more. Everything that system administrators, developers, and power users need to know about Linux is referenced here, and they will turn to this book again and again.

Beginning Sensor Networks with Arduino and Raspberry Pi Charles Bell, 2014-01-23 Beginning Sensor Networks with Arduino and Raspberry Pi teaches you how to build sensor networks with Arduino, Raspberry Pi, and XBee radio modules, and even shows you how to turn your Raspberry Pi into a MySQL database server to store your sensor data! First you'll learn about the different types of sensors and sensor networks, including how to build a simple XBee network. Then you'll walk through building an Arduino-based temperature sensor and data collector, followed by building a Raspberry Pi-based sensor node. Next you'll learn different ways to store sensor data, including writing to an SD card, sending data to the cloud, and setting up a Raspberry Pi MySQL server to host your data. You even learn how to connect to and interact with a MySQL database server directly from an Arduino! Finally you'll learn how to put it all together by connecting your Arduino sensor node to your new Raspberry Pi database server. If you want to see how well Arduino and Raspberry Pi can get along, especially to create a sensor network, then Beginning Sensor Networks with Arduino and Raspberry Pi is just the book you need.

Hazard Mitigation Grant Program Desk Reference (FEMA 345) Federal Emergency Management Agency, 2013-02-01 FEMA's Hazard Mitigation Grant Program is a powerful resource in the combined effort by Federal, State, and local government, as well as private industry and homeowners, to end the cycle of repetitive disaster damage. The Robert T. Stafford Disaster Relief and Emergency Assistance Act was passed on November 23, 1988, amending Public Law 93-288, the Disaster Relief Act of 1974. The Stafford Act included Section 404, which established the Hazard Mitigation Grant Program. In 1993, the Hazard Mitigation and Relocation Act amended Section 404 to increase the amount of HMGP funds available and the cost-share to 75 percent Federal. This amendment also encouraged the use of property acquisition and other non-structural flood mitigation measures. In an effort to streamline HMGP delivery, FEMA encourages States to develop their mitigation programs before disaster strikes. States are adopting a more active HMGP management role. Increased capabilities may include: Conducting comprehensive all-hazard mitigation planning prior to disaster events; Providing applicants technical assistance on sound mitigation techniques and hazard mitigation policy and procedures; Coordinating mitigation programs through interagency teams or councils. Conducting benefit-cost analyses; and Preparing National Environmental Policy Act reviews for FEMA approval. States that integrate the HMGP with their frequently updated State Administrative and Hazard Mitigation Plans will create cohesive and effective approaches to loss reduction. This type of coordinated approach minimizes the distinction between “predisaster” and “post-disaster” time periods, and instead produces an ongoing mitigation effort. Hazard mitigation is any sustained action taken to reduce or eliminate long-term risk to people and property from natural hazards and their effects. A key purpose of the HMGP is to ensure that the opportunity to take critical mitigation measures to protect life and property from future disasters is not lost during the recovery and reconstruction process following a disaster. Program grant funds available under Section 404 of the Stafford Act provide States with the incentive and capability to implement mitigation measures that previously may have been infeasible. The purpose of this Desk Reference is to: Provide comprehensive information about FEMA's Hazard Mitigation Grant Program (HMGP); Increase awareness of the HMGP as an integral part of statewide hazard mitigation efforts; and Encourage deeper commitments and increased responsibilities on the part of all States and communities to reduce damage and losses from natural disasters. This Desk Reference is organized to simplify program information and assist the reader with practical guidance for successful participation in the program. Lists of program-related acronyms and definitions are included, along with appendices that amplify selected aspects of the HMGP. This Desk Reference is organized into 14 sections, each of which presents a major HMGP subject area. In each section, information is presented on the right side of the page. In several sections, job aids containing supplemental material are provided. The job aids for each section can be found at the end of the section. At the front of each section, there is a detailed table of contents to help you locate specific information.

Prayer & Worship , 2020-08-27 In the Church prayer and worship is often thought of as singing hymns and asking God to bless your baby's first birthday or great aunt's hip surgery. Isn't that what I do to be a good Christian? But did you know that worship is far more than singing? Did you know that prayer is far more than reciting a repeat after me prayer? As people of habit and routine, prayer can become just another daily ritual where we lose sight of its richness and true purpose—talking to God Himself. Prayer & Worship addresses the purpose of prayer and worship in the life of a believer and the importance of remaining steadfast in it. It discusses the different ways we can approach God, what is required of us before approaching God, how we are to use our whole bodies in prayer, and, finally, practical tips found in the Psalms. However, more than giving tips and pointers which can themselves become a checklist, our hope is that this little booklet will get you to rethink WHY you do what you do. Worship is a lifestyle and not merely an aspect of something we do. We worship God with our very lives, and we need to keep our hearts engaged with God. He desires to meet with us. The question is: will you meet with Him?
