*Because It Is Wrong: Torture, Privacy and Presidential Power in the Age of Terror* Charles Fried, Gregory Fried, 2010-09-06 Elevating the torture and privacy debate, this book brilliantly challenges the knee-jerk responses of those in media and government. Can torture ever be justified? When is eavesdropping acceptable? Should a kidnapper be waterboarded to reveal where his victim has been hidden? Ever since 9/11 there has been an intense debate about the government's application of torture and the pervasive use of eavesdropping and data mining in order to thwart acts of terrorism. To create this seminal statement on torture and surveillance, Charles Fried and Gregory Fried have measured current controversies against the philosophies of Aristotle, Locke, Kant, and Machiavelli, and against the historic decisions, large and small, of Jefferson, Lincoln, and Pope Sixtus V, among many others. *Because It Is Wrong* not only discusses the behavior and justifications of Bush government officials but also examines more broadly what should be done when high officials have broken moral and legal norms in an attempt to protect us. This is a moral and philosophical meditation on some of the most urgent issues of our time.

**Nclex-Rn Review** Sylvia Rayfield & Associates Inc,2013-06-15 If you are a nursing student or a new nursing graduate, what is the most important exam you will ever take? Of course the answer is the NCLEX ! ®. What makes this book different from all other review books? Utilizing Accelerated Learning Methods, we have blended a smorgasbord of learning into one book. There is opportunity to visit a large number of audio and video URLs for virtual learning. Current NCLEX ® STANDARDS from research provide the complete structure for this book and make it significant. The unique arrangement of factual nursing concepts ties the simple to the complex to make learning easier. Practice questions are clinical reasoning, high difficulty level NCLEX ® style items structured with the same percentages that are in the current test plan. Quality over quantity lessens the number of items needed for practice. Authors are NCLEX ® specialists with years of experience and current information. Author experiences provide a look at the unseen and unspoken that make nursing an art as well as a science. This Book is divided into eleven chapters organized around the body systems with each chapter including adult and children's health issues. Each chapter includes high-difficulty level questions, developed with the same percentages as found on the current NCLEX ® exam at the end of both the adult and pediatric sections. The entire book is 490 pages and includes a professionally prepared index.

**Mann's Pharmacovigilance** Elizabeth B. Andrews,Nicholas Moore,2014-03-24 Highly Commended at the BMA Medical Book

Awards 2015 Mann's Pharmacovigilance is the definitive reference for the science of detection, assessment, understanding and prevention of the adverse effects of medicines, including vaccines and biologics. Pharmacovigilance is increasingly important in improving drug safety for patients and reducing risk within the practice of pharmaceutical medicine. This new third edition covers the regulatory basis and the practice of pharmacovigilance and spontaneous adverse event reporting throughout the world. It examines signal detection and analysis, including the use of population-based databases and pharmacoepidemiological methodologies to proactively monitor for and assess safety signals. It includes chapters on drug safety practice in specific organ classes, special populations and special products, and new developments in the field. From an international team of expert editors and contributors, Mann's Pharmacovigilance is a reference for everyone working within pharmaceutical companies, contract research organisations and medicine regulatory agencies, and for all researchers and students of pharmaceutical medicine. The book has been renamed in honor of Professor Ronald Mann, whose vision and leadership brought the first two editions into being, and who dedicated his long career to improving the safety and safe use of medicines.

**The Syndicate** Nicholas Hagger, 2004 This highly topical and controversial work provides an alternative view of 20th century history. It describes the activities of a small group of men whose wealth and influence have been grossly underestimated. It gives the background to the war on terror, and points out the dangers in the increasing trend towards world government.

Electronic Literature as a Model of Creativity and Innovation in Practice (Elmcip), Volume 4 Scott Rettberg, Sandy

Baldwin, 2014-04 *Electronic Literature as a Model of Creativity and Innovation in Practice* maps electronic literature in Europe and is an essential read for scholars and students in the field. ELMCIP is a three-year (2013) collaborative research project funded by Humanities in the European Research Area (HERA) JRP for Creativity and Innovation. ELMCIP involved seven European partners investigating how creative communities of practitioners form within a transnational and transcultural context in a globalized and distributed communication environment. Focusing on the electronic literature community in Europe as a model of networked creativity and innovation in practice, ELMCIP studies the formation and interactions of that community and furthers electronic literature research and practice in Europe. This book includes reflective reports by all of the principal investigators of the project. It details the development of a major digital humanities research database and the publication of the first trans-European anthology of electronic literature, and includes a report on electronic literature publishing venues across Europe and consideration of different forms of creative communities develop around genres of digital practice.

**Geographers** Hayden Lorimer, Charles W. J.

Withers, 2015-12-14 *Volume thirty-one of Geographers:*

*Biobibliographical Studies* brings together nine essays on leading geographers and their work. With its publication, the cumulative record of geographers' lives and works in GBS exceeds 460 essays. Here, the editors bring forward critical appraisals of six French geographers, and so illustrate the rich traditions of geographical scholarship in that country; of a leading Portuguese figure; a Briton who played a major role in establishing geography in modern New Zealand; and a British woman who pioneered connections between the history of geography in practice and the histories of science and technology.

Geographers' lives and geography's making is wonderfully illuminated in international, national and cross-disciplinary

context.
