Implementing Mental Health Promotion Margaret M. Barry, Aleisha M. Clarke, Inge Petersen, Rachel Jenkins, 2019-10-31 This book offers a comprehensive overview of current research, policy, and practice developments in promoting mental health and well-being. It offers guidance on developing and delivering mental health promotion interventions across a variety of settings internationally. Chapters outline key mental health promotion concepts, implementation processes, and outcomes through empirical findings, practical advice based on successful evidence-based approaches, and templates for action. In addition, chapters answer key “how” questions on practical implementation as well as the “whys”, providing rationales for mental health promotion and identifying the key factors and underlying principles that make these interventions work. The book includes examples of evidence-based practice with 17 case studies of innovative interventions from different international settings. These case studies illustrate the practical aspects of intervention development and delivery and the realities of implementing policies and programmes outside of controlled research conditions. Topics featured in this book include: · Interventions that promote gender equality. · Community empowerment models of mental health promotion. · Mental health promotion in the home for children and parents. · Promoting social and emotional learning in schools. · Addressing stress and promoting mentally healthy workplaces. · Mental health promotion within primary health care. · Re-orienting mental health services to mental health promotion for service users and caregivers. **Border** Leon Claire Metz, 2008 Fourteen years in the making, this is a chronicle of the nearly two-thousand-mile international line between the United States and Mexico. It is an historical account largely through the eyes and experiences of government agents, politicians, soldiers, revolutionaries, outlaws, Indians, engineers, immigrants, developers, illegal aliens, business people, and wayfarers looking for a job. It is essentially the untold story of lines drawn in water, sand, and blood, of an intrepid, durable people, of a civilization whose ebb and flow of history is as significant as any in the world. Award-winning historian Leon Metz takes the reader from America's early westward expansion to today's awesome border problems of water rights,

pollution, immigration, illegal aliens, and the massive effort of two nations attempting to pull together for a common cause.

A Wary Partnership Euijin Jung,Arvind Subramanian,Steven R. Weisman,2020-09-30 This PIIE Briefing published by the Peterson Institute for International Economics traces the complex economic relationship between India and the rest of the world, focusing on the United States. The various chapters, by leading experts, emphasize the contrast between political ties between Washington and New Delhi, which have steadily improved since the 1980s, culminating in the landmark nuclear agreement in 2005, and economic ties, which have lagged despite intensive negotiations and pledges of cooperation. The current moment of uncertainty and turbulence may not seem to be the time for a new collaborative chapter in this frequently contentious economic relationship. But the authors argue instead that a crisis can compel leaders of both countries to rethink their failed policies and expand, not reduce, their economic cooperation. By examining the record of international economic policies in the world's two most populous democracies, this volume can illuminate a path forward. There are no illusions in these essays about the costs and obstacles. Their assumption is that learning the lessons of the past can guide the way for progress in the future.

**Knowledge Society** Anna-Katharina Hornidge,2007 Abstract: At a time of knowledge becoming increasingly relevant to social and economic development, governments worldwide aim at the creation of country-specific types of k-society, i.e. 'information societies', 'knowledge societies' or 'knowledge-based economies'. This book redraws the processes of constructing k-societies in Germany and Singapore and offers an empirically based definition of k-society which has been missing until now. Based on the conducted research, I argue that k-societies are created by collective actors in society and are not - as often assumed - merely the result or logical consequence of the technological developments in the information and communication sector, the growth of the service industry and the high profit margin of knowledge intensive goods. I empirically focus on the activities of the state as collective actor who massively pursues the creation of k-societies in Germany and Singapore. The remaining subsystems engaged in the construction process - economy

**Spaces of the Poor** Hans-Christian Petersen,2014-04-30 What do we know about the urban impoverished areas of the world and the living environment of its inhabitants? How did the urban poor cope with their surroundings? How did they interpret and adopt urban space in order to fight against their position at the periphery of society? This volume takes up these questions and investigates how far approaches of cultural sciences can contribute to overcome the »exoticization of the ghetto« (Loïc Wacquant) and instead to look at the heterogeneity and individuality behind the facades. It opens new perspectives for the research of poverty and inequalities that do not stop at collective categories.
