The Man Who Saved New York Seymour P. Lachman, Robert Polner, 2010-07-01 Winner of the 2011 Empire State History Book Award presented by New York State Archives Partnership Trust The Man Who Saved New York offers a portrait of one of New York's most remarkable governors, Hugh L. Carey, with emphasis on his leadership during the fiscal crisis of 1975. In this dramatic and colorful account, Seymour P. Lachman and Robert Polner's examine Carey's youth, military service, and public career against the backdrop of a changing, challenged, and recession-battered city, state, and nation. It was Carey's leadership, Lachman and Polner argue, that helped rescue the city and state from the brink of financial and social ruin. While TV comedians mocked and tabloids shrieked about the Big Apple's rising muggings, its deteriorating public services, and the threats and walkouts by embattled police, firefighters, and teachers, all amid a brutal recession, Carey and his team managed to hold on and ultimately prevailed, narrowly preventing a huge disruption to the state, national, and global economy. At one point, the city came within a few hours of having to declare itself incapable of paying its debts and obligations, but in the end stability and consensus prevailed, and America's largest city stayed out of bankruptcy court. The center held. Based on extensive interviews with Carey and his family, as well as numerous friends, observers, and former advisors, including Steven Berger, David Burke, John Dyson, Peter Goldmark, Judah Gribetz, Richard Ravitch, and Felix Rohatyn, The Man Who Saved New York aims to place Carey and his achievements at the center of the financial maelstrom that met his arrival in Albany. While others were willing to let the city go into default, Carey was strongly opposed, since it would not only affect the state as a whole but would have reverberations both nationally and internationally. In recounting the 1975 rescue of New York City and the aftershocks that nearly sank the state government, Lachman and Polner illuminate the often-volatile interplay among elite New York bankers, hard-nosed municipal union leaders, the press, and influential conservatives and liberals from City Hall to the Albany statehouse to the White House. Although often underappreciated by the public, it was Carey's force of will, wit, intellect, judgment, and experiences that allowed the state to survive this unparalleled ordeal and ultimately to emerge on a stronger footing. Further, Lachman and Polner argue, Carey's accomplishment is worth recalling as a prime example of how governments—local, state, and federal—can work to avoid the renewed threat of bankruptcy that now confronts many overstretched states and localities.

Pruning for Fruit Bruce Morphet, Gilbert Roelof Maria Dashorst, 2008 Everyone loves fruit, especially when it's juicy, full of flavour and fresh from your garden. However, many people don't know that pruning is critical to establishing and maintaining your trees and vines to get the best from them. This beautifully illustrated book will show you how to maintain good fruit size, obtain quality, quantity, training, and generally when, what and how to do it!

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

The State of the World's Children 2019 United Nations, 2019-10-15 This report examines nutrition, providing a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades, around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity, which affects 38 million children. All these forms of malnutrition threaten children's development, while obesity is creating a lifelong legacy of disease. At the heart of this evolving challenge is a global shift towards modern diets that do not meet children's nutritional requirements. The report provides unique data and analysis of malnutrition in the 21st century and outlines recommendations to put children's needs at the heart of global and national food systems.

WEB-BASED INFORMATION TECHNOLOGIES AND DISTRIBUTED SYSTEMS Quan Z Sheng, 2010-06-01 The Fourth International Conference on Signal-Image Technology & Internet-Based Systems (SITIS 2008) has been successfully held during the period 30th November to 3rd of December of the year 2008 in Bali, Indonesia. The Track Web-Based Information Technologies & Distributed Systems (WITDS) is one of the four tracks of the conference. The track is devoted to emerging and novel concepts, architectures and methodologies for creating an interconnected world in which information can be exchanged easily, tasks can be processed collaboratively, and communities of users with similar interests can be formed while addressing security threats that are present more than ever before. The track has attracted a large number of submissions; only fifteen papers have been accepted with acceptance rate 27%. After the successful presentations of the papers during the conference, the track chairs have agreed with Atlantis publisher

to publish the extended versions of the papers in a book. Each paper has been extended with a minimum of 30% new materials from its original conference manuscript. This book contains these extended versions as chapters after a second round of reviews and improvement. The book is an excellent resource of information to researchers and it is based on four themes; the first theme is on advances in ad-hoc and routing protocols, the second theme focuses on the latest techniques and methods on intelligent systems, the third theme is a latest trend in Security and Policies, and the last theme is applications of algorithms design methodologies on web based systems.

XX International Grassland Conference: Offered papers F.P. O'Mara, R.J. Wilkins, L. 't Mannetje, D.K. Lovett, P.A.M. Rogers, T.M. Boland, 2023-08-28 This book contains a compilation of offered papers presented at the main congress of the XX International Grassland Congress held in University College Dublin, Ireland from 26 June to 1 July, 2005. It is complemented by six other books arising from the XX IGC as listed on the back cover: the book of invited papers from the main congress and five books containing the proceedings of five satellite workshops held immediately after the main congress at locations in the UK and Ireland (Aberystwyth, Belfast, Cork, Glasgow and Oxford). The workshops were designed to facilitate more in-depth presentations and discussions on more specialised topics of worldwide significance. The main congress brought together scientists from many disciplines, policy makers, consultants and producers involved directly in grass production and utilisation, as well as people in associated industries. They discussed issues around the theme of the congress, Grasslands : a Global Resource. The congress programme was organised around three main thematic areas: Efficient Production from Grassland Grassland and the Environment Delivering the Benefits from Grassland

Turbo Code Applications Keattisak Sripimanwat, 2005-10-07 Turbo Code Applications: a journey from a paper to realization presents c- temporary applications of turbo codes in thirteen technical chapters. Each chapter focuses on a particular communication technology utilizing turbo codes, and they are written by experts who have been working in related th areas from around the world. This book is published to celebrate the 10 year anniversary of turbo codes invention by Claude Berrou Alain Glavieux and Punya Thitimajshima (1993-2003). As known for more than a decade, turbo code is the astonishing error control coding scheme which its perf- mance closes to the Shannon's limit. It has been honored consequently as one of the seventeen great innovations during the first fty years of information theory foundation. With the amazing performance compared to that of other existing codes, turbo codes have been adopted into many communication s- tems and incorporated with various modern industrial standards. Numerous research works have been reported from universities and advance companies worldwide. Evidently, it has successfully revolutionized the digital commu- cations. Turbo code and its successors have been applied in most communications starting from the ground or terrestrial systems of data storage, ADSL modem, and fiber optic communications. Subsequently, it moves up to the air channel applications by employing to wireless communication systems, and then rises up to the space by using in digital video broadcasting and satellite com- nications. Undoubtedly, with the excellent error correction potential, it has been selected to support data transmission in space exploring system as well.

State of the World's Children UNICEF., 2009 On 20 November 2009, the global community celebrates the 20th anniversary of the adoption by the United Nations General Assembly of the Convention on the Rights of the Child, the unique document that sets international standards for the care, treatment and protection of all individuals below age 18. To celebrate this landmark, the United Nations Children's Fund is dedicating a special edition of its flagship report The State of the World's Children to examining the Convention's evolution, progress achieved on child rights, challenges remaining, and actions to be taken to ensure that its promise becomes a reality for all children.

In Defence of Animals Peter Singer, 1985-01-01 In Singer's book, the idea of the animal rights movement is set in the context of scientific knowledge, philosophy, and ethics. This highly readable account gives an invaluable introduction to modern thought on animal rights. (Animals/Pets)

Equity, Growth, and Community Chris Benner, Manuel Pastor, 2015-10-09 In the last several years, much has been written about growing economic challenges, increasing income inequality, and political polarization in the United States. Addressing these new realities in America's metropolitan regions, this book argues that a few lessons are emerging: first, inequity is bad for economic growth; second, bringing together the concerns of equity and growth requires concerted local action; and third, the fundamental building block for doing this is the creation of diverse and dynamic epistemic (or knowledge) communities, which help to overcome political polarization and to address the challenges of economic restructuring and social divides. "As America bolts toward a more multiracial future in the face of skyrocketing inequality, local leaders are desperately seeking strategies to foster more inclusive growth. Chris Benner and Manuel Pastor's research uncovers a critical ingredient of success: diverse regional leaders coming together to build a foundation of shared knowledge and advance positive change." -- ANGELA GLOVER BLACKWELL, Founder and CEO, PolicyLink CHRIS BENNER is the Dorothy E. Everett Chair in Global Information and Social Entrepreneurship, Director of the Everett Program for Digital Tools for Social Innovation, and Professor of Environmental Studies and Sociology at the University of California, Santa Cruz. His most recent book, coauthored with Manuel Pastor, is Just Growth: Inclusion and Prosperity in America's Metropolitan Region. His other books include This Could Be the Start of Something Big: How Social Movements for Regional Equity Are Transforming Metropolitan America and Work in the New Economy: Flexible Labor Markets in the New Economy. MANUEL PASTOR is Professor of Sociology and American Studies and Ethnicity at the University of Southern California, where he also serves as Director of USC's Program for Environmental and Regional Equity (PERE) and Codirector of USC's Center for the Study of Immigrant Integration (CSII). He is the coauthor of Uncommon Common Ground: Race and America's Future and This Could Be the Start of Something Big: How Social Movements for Regional Equity Are Transforming Metropolitan America.

The New Middle Classes Hellmuth Lange, Lars Meier, 2009-06-10 With respect to the developing and threshold economies, it is no longer the poor who are the only focus of media attention. Today, the new middle classes are about to take centre stage, too. With their lifestyles and attitudes, the new middle classes are considered to be both the products as well as the promoters of globalization. They are a highly heterogeneous group in socio-economic terms as well as in habits and preferences, including their societal role as consumers and citizens. The first wave of scholarly and political attention can be traced back to the mid-nineties. The focal point was

surprise and unease about indubitable symptoms of consumerism which, until then had been seen as a characteristic of the richest western societies. However, since the nineties, consumerism has run rampant in - velopingcountriestoo.This has particularly been noted with respect to the emerging middle classes in South East Asia. The “will to consume seemed inexhaustible, and appetites insatiable. This rage to consume [...] was both celebrated and feared by political leaders and other social/moral gatekeepers, who began to condemn the process as ‘Westernization’ and even ‘westoxification’” (Chua 2000: xii). Ever since, the debate about the lifestyles of the new middle classes and their role in society has gained momentum.

web aug 11 2021 model based predictive control mpc describes a set of advanced control methods which make use of a process model to predict the future behavior of the controlled system by solving a potentially constrained optimization problem mpc determines the control law implicitly

handbook of model predictive control springerlink - Dec 07 2022

web recent developments in model predictive control promise remarkable opportunities for designing multi input multi output control systems and improving the control of single input single output systems this volume provides a definitive survey of the latest model predictive control methods available to engineers and scientists today

model predictive control springerlink - Nov 06 2022

web jun 25 2021 this chapter introduces the basic concepts of model predictive control mpc theory necessary to design the controller in later chapters with a focus on mpc for linear systems the design of controllers with different objective functions is covered and some key methods such as reference tracking are presented while elaborating on *model predictive control theory computation and design* - Jan 08 2023
