*Phoenix Rising* Donald G. Lett,2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, How can a modern society scale back its dependence on gasoline as a motive source?' Are there genuine alternative power sources?' Are they the answer to a growing crisis?' Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain extent. Handicaps that caused their disappearance in the first place.

*Creating a Web Site: The Missing Manual* Matthew MacDonald,2008-12-30 Think you have to be a technical wizard to build a great web site? Think again. If you want to create an engaging web site, this thoroughly revised, completely updated edition of *Creating a Web Site: The Missing Manual* demystifies the process and provides tools, techniques, and expert guidance for developing a professional and reliable web presence. Whether you want to build a personal web site, an e-commerce site, a blog, or a web site for a specific occasion or promotion, this book gives you detailed instructions and clear-headed advice for: Everything from planning to launching. From picking and buying a domain name, choosing a Web hosting firm, building your site, and uploading the files to a web server, this book teaches you the nitty-gritty of creating your home on the Web. Ready-to-use building blocks. Creating your own web site doesn't mean you have to build everything from scratch. You'll learn how to incorporate loads of pre-built and freely available tools like interactive menus, PayPal shopping carts, Google ads, and Google Analytics. The modern Web. Today's best looking sites use powerful tools like Cascading Style Sheets (for sophisticated page layout), JavaScript (for rollover buttons and cascading menus), and video. This book doesn't treat these topics as fancy frills. From step one, you'll learn easy ways to create a powerful site with these tools. Blogs. Learn the basics behind the Web's most popular form of self-expression. And take a step-by-step tour through Blogger, the Google-run blogging service that will have you blogging before you close this book. This isn't just another dry, uninspired book on how to create a web site. *Creating a Web Site: The Missing Manual* is a witty and intelligent guide you need to make your ideas and vision a web reality.

The teaching of ICT in the key stage needs to be radically revised to implement the new proposals, and this book will support teachers, student teachers and schools as they do. This book will: help teachers assess the development of students' ICT capability; explain the document for busy practioners and clarify what the strategy expects of them; offer practical suggestions on how to meet the needs of students.

*Abortion and Nation* Lisa Smyth,2017-03-02 Abortion politics are contentious and divisive in many parts of the world, but nowhere more so than in Ireland. *Abortion and Nation* examines the connection between abortion politics and hegemonic struggles over national identity and the nation-state in the Irish Republic. Situating the abortion question in the global context of human rights politics, as well as international social movements, Lisa Smyth analyses the formation and transformation of abortion politics in Ireland from the early 1980s to the present day. She considers whether or not the shifting connections between morality, rights and nationhood promise a new era of gender equality in the context of nation-state citizenship. The book provides a new sociological framework through which the significance of conflict over abortion and reproductive freedom is connected to conflict over national identity. It also offers a distinctive in-depth consideration of the connection between gender and nationhood, particularly in terms of its impact on women's status as citizens; within the nation-state; within the European Union; and as members of a global civil society.

**Pathology for the Physical Therapist Assistant** Penelope J Lescher,2011-03-02 With other texts written at either too high or too low a level, this book meets the needs of PTA students for usable, understandable pathology related to clinical application. Extensively illustrated, this book allows students to more easily comprehend and maintain interest in otherwise complicated pathological processes. The fourteen chapter format effectively fits within a chapter per week course structure, or each chapter may be used as a stand alone module within any course.

*Mechanical Design Engineering Handbook* Peter R. N. Childs,2018-11-24 *Mechanical Design Engineering Handbook*, Second Edition, is a straight-talking and forward-thinking reference covering the design, specification, selection, use and integration of the machine elements that are fundamental to a wide range of engineering applications. This updated edition includes new material on tolerancing, alternative approaches to design, and robotics, as well as references to the latest ISO and US engineering regulations. Sections cover bearings, shafts, gears, seals, belts and chains, clutches and brakes, springs, fasteners, pneumatics and hydraulics, amongst other core mechanical elements. This practical handbook is an ideal shelf reference for those working in mechanical design across a variety of industries. In addition, it is also a valuable learning resource for advanced students undertaking engineering design modules and projects as part of broader mechanical, aerospace, automotive and manufacturing programs. Presents a clear, concise text that explains key component technology, with step-by-step procedures, fully worked design scenarios, component images and cross-sectional line drawings Provides essential data, equations and interactive ancillaries, including calculation spreadsheets, to inform decision-making, design evaluation and incorporation of components into overall designs Includes procedures and methods that are covered to national and international standards where appropriate New to this edition: flow-charts to help select technology; Failure Mode Effects Analysis (FMEA), product, service and system design models, Functional Analysis Diagrams (FADs), Design for Excellence (DFX), Design for MADE, and the process of remanufacture

*Internet Programming with Visual Basic* Budi Kurniawan,2000-09-01 This book covers what Visual Basic developers need to know in order to combine Visual Basic with Microsoft Internet Information Server (IIS). Veteran author Budi Kurniawan shows developers everything they need to know to successfully design and implement a Web application without over-simplifying the process or leaving out a single step. He provides a thorough treatment of Webclasses, which, though poorly documented elsewhere, are the key to connecting VB and IIS, while teaching developers how to build a successful VB based IIS application from start to finish.

*Sams Teach Yourself HTML and XHTML in 10 Minutes* Deidre Hayes,2002 A quick, practical, and task-oriented tutorial covers the basics of creating Web pages with HTML and XHTML. Fully updated and revised, this edition is accessible for beginning Windows and Macintosh users who want to learn about the latest developments in Web publishing, including the effects of XHTML 1.0 and 1.1 on Web publishing practices.

Using basic language instead of complex terminology, The HTML & ASP Handbook makes learning easy.

**Civic and Uncivic Values** Ola Listhaug,Sabrina P. Ramet,Dragana Dulić,2011-01-10 Discusses Serbia's struggle for democratic values after the fall of the Milošević regime provoked by the NATO war, and after the trauma caused by the secession of Kosovo. Are the value systems of the post-Milošević era true stumbling blocks of a delayed transition of this country? Seventeen contributors from Norway, Serbia, Italy, Germany, Poland and

some other European countries covered a broad range of topics in order to provide answers to this question. The subjects of their investigations were national myths and symbols, history textbooks, media, film, religion, inter-ethnic dialogue, transitional justice, political party agendas and other related themes. The authors of the essays represent different scholarly disciplines whose theoretical conceptions and frameworks are employed in order to analyze two alternative value systems in Serbia: liberal, cosmopolitan and civic on the one hand, and traditional, provincial, nationalist on the other.

*County Courthouse Book* Elizabeth Petty Bentley, 2009 The County Courthouse Book is a concise guide to county courthouses and courthouse records. It is an important book because the genealogical researcher needs a reliable guide to American county courthouses, the main repositories of county records. To proceed in his investigations, the researcher needs current addresses and phone numbers, information about the coverage and availability of key courthouse records such as probate, land, naturalization, and vital records, and timely advice on the whole range of services available at the courthouse. Where available he will also need listings of current websites and e-mail addresses. -- Publisher website.

**Waste Management for the Food Industries** Ioannis S. Arvanitoyannis, 2010-07-28 The continuously increasing human population, has resulted in a huge demand for processed and packaged foods. As a result of this demand, large amounts of water, air, electricity and fuel are consumed on a daily basis for food processing, transportation and preservation purposes. Although not one of the most heavily polluting, the food industry does contribute to the increase in volume of waste produced as well as to the energy expended to do so. For the first time, nine separate food industry categories are thoroughly investigated in Waste Management for the Food Industries in an effort to help combat this already acute problem. The current state of environmental management systems is described, offering comparisons of global legislation rarely found in other resources. An extensive review of commercial equipment, including advantages and disadvantages per employed waste management technique, offers a unique perspective for any academic, student, professional, and/or consultant in the food, agriculture and environmental industries. Thoroughly examines the most prevalent and most polluting industries such as Meat, Fish, Dairy, Olive Oil, Juice and Wine industries Includes synoptical tables [methods employed, physicochemical or microbiological parameters altered after treatment etc] and comparative figures of the effectiveness of various waste management methods Contains nearly 2500 of the most up-to-date references available

Proceeding Book of Proceeding Indonesian Textile Conference : textile 4.0 clothing and beyond (international conference) Asril Senoaji Soekoco, Karlina Somantri, Valentinus Galih Vidia Putra, 2019-07-27 Welcome to the 3rd Indonesian Textile Conference (ITC) 2019. It is our great honor and pleasure to have you all here today. Indonesian Textile Conference is by far the only scientific event in the field of textiles in Indonesia aimed to bring together leading researchers, experts, students and people from the industry to share their knowledge and exchange scientific ideas. Indonesia is one of the leading textile exporter countries in the world with a total export value of USD 15.3 billion in 2015 and ranked the third after palm oil and steel (source: Ministry of Industry of Republic of Indonesia). It is one of the ten priority industries and the mainstay of Indonesian national industry. In a global economy and fast changing world, the future of Indonesian textile industry will increasingly depend on the industry's ability to relentlessly innovate in its products, to use the most advanced, flexible and resource-efficient processes and to focus its organizational structure as well as business operations according to the ever changing and growing needs of its customers. In all that, research and innovation are vital and play an ever increasing role. Indonesian Textile Conference was initiated and is dedicated to promote and bring progress to research and innovation in the field of textile and textile-related subjects in Indonesia. Textile is a rich multidisciplinary area of study and in fact has attracted a great deal of attention and numerous contributions from non-textile scientists. It is not just about clothing. It is all about material and all aspects that are inherent in the process of its production and applications. It covers a whole lot of area which includes but not limited to: advanced material and textile fibers, natural fibers and natural dyes, utilization of natural sources for textiles in general and/or functional textiles, environmental protection and ecological considerations in textile industry, life cycle analysis, clean/green production, best practices in energy efficient processes, bio-based polymer, bioengineering, nanotechnology, textile-based composites, industrial management and engineering, traditional textiles and batik, textile preservation and conservation, and design. Smart, functional and interactive textile is another area of interest which is quite recent and resulted from the convergence of latest developments in material science, physics and chemistry, microelectronics and informatics. Stimuli responsive materials, self-healing polymers, textile energy devices, textile sensor and antenna are only a few examples of development in this area. Recently added to this is a new emerging "fashionable technology". It is a new concept that brings fashion to the next level by integrating technology and fashion. It looks at the future fashion as intersection of design, fashion, science, and technology beyond wearable technology. Still another important and interesting issue in textile is sustainability, especially due to the stigma associated with the industry as the big polluter and being not environmentally-friendly. Sustainable textiles and clothing involves the choice of materials, technologies and processing methods that ensure environmental and social friendliness and safety to human health throughout the entire life-cycle phases. Thus, there is an ample room for almost everyone to contribute in this conference. On behalf of the Organizing Committee and the management of Politeknik STTT Bandung, have a productive and fruitful conference.

Globalization and Education Joshua Ka-ho Mok, David Kin-keung Chan, 2001-12-01 The growing impact of globalization has affected educational development in many parts of the globe. In order to maintain national competitiveness in the global marketplace, governments across the world have started to review their education systems and introduce different reform initiatives in education in order to enhance the global capacity of their citizens. This book adopts the wider perspective of globalization in order to examine and critically reflect upon the origin, evolution and development of the Quality Education Movement in Hong Kong. It pays particular attention to how Hong Kong's education has been affected by the global trend to economic rationalism and managerialism. More specifically, the major aim of this book is to examine and analyse the most recent reform measures adopted by the HKSAR in its quest for quality education in Hong Kong. This book is divided into four parts. Part One provides the theoretical/conceptual framework and historical context for the book. Part Two focuses on approaches to quality education. Part Three focuses on policy change and education reforms that are operationalized in school and higher education institutions. Part Four is a reflection and conclusion. The editors discuss the impacts and the costs of managerialism in the education sector, and suggest the kind of policy implications it might have when adopting a managerial approach in education.

*The Final Countdown Vol.1* Billy Crone, 2017-04-20 Because God loves us, He has given us many warning signs to show us that the 7-year Tribulation is near and that the return of Jesus Christ is rapidly approaching. Therefore, The Final Countdown takes a look at 10 signs given by God to lovingly wake us up so we'd give our lives to Him before it's too late. These signs are the Jewish People, Modern Technology, Worldwide Upheaval, The Rise of Falsehood, The Rise of Wickedness, The Rise of Apostasy, One World Religion, One World Government, One World Economy, and The Mark of the Beast. Like it or not, we are headed for The Final Countdown. Please, if you've haven't already done so, give your life to Jesus today, because tomorrow may be too late!
