Incentivizing Peace Jaroslav Tir, Johannes Karreth, 2018-01-24 Civil wars are among the most difficult problems in world politics. While mediation, intervention, and peacekeeping have produced some positive results in helping to end civil wars, they fall short in preventing them in the first place. In *Incentivizing Peace*, Jaroslav Tir and Johannes Karreth show that considering civil wars from a developmental perspective presents opportunities to prevent the escalation of nascent armed conflicts into full-scale civil wars. The authors demonstrate that highly-structured intergovernmental organizations (IGOs such as the World Bank, IMF, or regional development banks) are particularly well-positioned to engage in civil war prevention. When such IGOs have been actively engaged in nations on the edge, their potent economic tools have helped to steer rebel-government interactions away from escalation and toward peaceful settlement. *Incentivizing Peace* provides enlightening case evidence that IGO participation is a key to better predicting, and thus preventing, the outbreak of civil war.

What's In a Name? That Which We Call Capital Controls Mr.Atish R. Ghosh, MissMahvash Qureshi,2016-02-12 This paper investigates why controls on capital inflows have a bad name, and evoke such visceral opposition, by tracing how capital controls have been used and perceived, since the late nineteenth century. While advanced countries often employed capital controls to tame speculative inflows during the last century, we conjecture that several factors undermined their subsequent use as prudential tools. First, it appears that inflow controls became inextricably linked

with outflow controls. The latter have typically been more pervasive, more stringent, and more linked to autocratic regimes, failed macroeconomic policies, and financial crisis—inflow controls are thus damned by this “guilt by association.” Second, capital account restrictions often tend to be associated with current account restrictions. As countries aspired to achieve greater trade integration, capital controls came to be viewed as incompatible with free trade. Third, as policy activism of the 1970s gave way to the free market ideology of the 1980s and 1990s, the use of capital controls, even on inflows and for prudential purposes, fell into disrepute.
