A Dictionary of Heraldry Charles Norton Elvin,2009-06 This is an extremely useful and comprehensive illustrated dictionary of heraldic terms, a necessity whether one's interest is that of an artist, engraver, heraldist, librarian, or genealogist. Elvin's book is as useful today as it was 110 years ago when the author wrote that the aim of the present work is not to furnish an account of the antiquity and progress of Heraldry, but to provide as succinctly as possible, and in Alphabetical order, a list of the terms met with in the Science, with their appropriate Illustrations. The outstanding feature of this book is the set of 47 plates (done by Elvin) depicting over 2,500 illustations of the various heraldic charges, with blazonings, arranged by subject headings such as Badges, Bend, Chevron, Cross, and the like, thus providing a complete dictionary of terms, each term having an exact reference to a matching illustration. As a result, the identification of unrecognized charges is easy.

Muslim Reformist Political Thought Sarfraz Khan,2013-05-13 There are two main trends distinguishable amongst Muslim reformists - revivalists and modernists. This book charts and analyses the main trends of Muslim reformist political thought in Bukhara. It is the first to utilize original sources preserved in Soviet archives that were previously inaccessible to western scholars. The author has translated numerous original documents from Tajiki and Russian into English. This book thus serves as a useful resource for students of Islam, Central Asia, the former Soviet Union, and of law, politics and philosophy.

The Common Lawyers of Pre-Reformation England E. W. Ives,1983-04-07 The English common lawyers wielded their greatest influence in the late fifteenth and early sixteenth centuries, with names like Fortescue, Littleton and More. In these years they were more than the only organized lay profession: in the infancy of statute, they, more than anyone, shaped and changed the law; they were the managerial elite of the country; they were the single most dynamic group in society. This book is a study of their formative impact on the whole of English life. Part I examines the legal profession, its position, recruitment, training and career structure, taking as an example the career of Thomas Kebell, a serjeant at-law from Leicestershire, for whom documentation is unusually complete. Part II analyses legal practice: how the lawyer acquired and kept clients, his relationship with them, the pattern of employment, the nature of practice as revealed in the year books, and the attitudes and approaches of the lawyer to the law. The third part considers the impact of the lawyers on substantive law and legal organization.

Design of Ultra Wideband Power Transfer Networks Binboga Siddik Yarman,2010-02-22 Combining analytic theory and modern computer-aided design techniques this volume will enable you to understand and design power transfer networks and amplifiers in next generation radio frequency (RF) and microwave communication systems. A comprehensive theory of circuits constructed with lumped and distributed elements is covered, as are electromagnetic field theory, filter theory, and broadband matching. Along with detailed roadmaps and accessible algorithms, this book provides up-to-date, practical design examples including: filters built with microstrip lines in C and X bands; various antenna matching networks over HF and microwave frequencies; channel equalizers with arbitrary gain shapes; matching networks for ultrasonic transducers; ultra wideband microwave amplifiers constructed with lumped and distributed elements. A companion website details all Real Frequency Techniques (including line segment and computational techniques) with design tools developed on MatLab. Essential reading for all RF and circuit design engineers, this is also a great reference text for other electrical engineers and researchers working on the development of communications applications at wideband frequencies. This book is also beneficial to advanced electrical and communications engineering students taking courses in RF and microwave communications technology.
