High Minds Simon Heffer, 2022-04-05 An ambitious exploration of the making of the Victorian Age—and the Victorian mind—by a master historian. Britain in the 1840s was a country wracked by poverty, unrest, and uncertainty; there were attempts to assassinate the queen and her prime minister; and the ruling class lived in fear of riot and revolution. By the 1880s it was a confident nation of progress and prosperity, transformed not just by industrialization but by new attitudes to politics, education, women, and the working class. That it should have changed so radically was very largely the work of an astonishingly dynamic and high-minded group of people—politicians and philanthropists, writers and thinkers—who in a matter of decades fundamentally remade the country, its institutions and its mindset, and laid the foundations for modern society. High Minds explores this process of transformation as it traces the evolution of British democracy and shows how early laissez-faire attitudes to the fate of the less fortunate turned into campaigns to improve their lives and prospects. The narrative analyzes the birth of new attitudes in education, religion, and science. And High Minds shows how even such aesthetic issues as taste in architecture collided with broader debates about the direction that the country should take. In the process, Simon Heffer looks at the lives and deeds of major politicians; at the intellectual arguments that raged among writers and thinkers such as Matthew Arnold, Thomas Carlyle, and Samuel Butler; and at the great projects of the age, from the Great Exhibition to the Albert Memorial. Drawing heavily on previously unpublished documents, he offers a superbly nuanced portrait into life in an extraordinary era, populated by extraordinary people—and show how the Victorians' pursuit of perfection gave birth to the modern Britain we know today.

**The Effects of Integrating Comorbid Patients Such as Schizophrenics, Heroin Addicts and Patients with Diagnostic Addictions and Dependences into a Primary Care Environment** Matthew Hamilton,2005-03-17 The results of previous investigations have revealed very sparse information concerning the real life effects of treating patients in a traditional primary care facility. These patients were violent, hallucinatory, boisterous, and manipulative. In addition, the majority sought to avoid primary medical care on every occasion. The process by which they were admitted and treated has been observed and reported in detail. Two hundred and fifty-six patients were enrolled over a period of five months in an integrated medical facility design. This facility provided both primary medical care and behavioral healthcare services. All patients were diagnosed as Mentally Ill Chemically Addicted (MICA). These patients consisted of schizophrenics, heroin addicts and patients with a myriad of addictions. Their treatment plans consisted of medical, behavioral and pharmacotherapy services. Receipt of methadone hydro-chloride was contingent upon total treatment plan compliance. This integrated facility was the first of its kind in full

operation in the state of New Jersey. Medical encounters consisted of comprehensive examinations, laboratory work and other medical tests. The length of time in treatment for patients in an integrated setting was compared to the State of New Jersey's mandatory examination protocols and summarized in the New Jersey Alcohol and Drug Abuse Data System (ADADS) six-month report for the period of January 1, 1998 July 1, 1998. The ages ranged from 0-55 and the n =29,857. The ADADS data indicates that 66% of all patients who entered a treatment program other than an integrated system were discharged in as little as 14 days. Conversely, the mean of time for all patients admitted into the study was 56.41 days, and the standard deviation was 34.94 days. The ages of the patients in the integrated setting were the same and the n = 256. Medical services dominated behavioral treatment by a ratio of 2:1. The analyses of these differences clearly suggest that integrated treatment is the best form of comprehensive care for these patients.

**The Prophets** Abraham Joshua Heschel,2007 Heschel attempts to understand the thoughts, feelings, and impressions of each of the prophets, presenting the reader with a sense of their very being. He effectively achieves a balance between the objective supernatural and the subjective human situation, and presents a discussion of Amos, Hosea, Isaiah, Micah, Jeremiah, and Habakkuk and their particular challenges and journeys. In the second part of the book, Heschel addresses such subjects as pathos, wrath, sympathy, ecstasy, psychosis, and prophetic and poetic inspiration, and in so doing offers a contribution to the philosophy of religion.
