F-5 Tigers Over Vietnam Anthony J. Tambini,2001

Northrop F-5 Gérard Paloque,2013 Although it was originally intended to provide the USAF with a lightweight fighter, in the end the Northrop F-5 had rather a marginal career in the United States, which used it mainly for training pilots in aerial combat. On the other hand it was a real success in the export market, with more than twenty countries around the world choosing this little effective twin-engined fighter which above all was cheap, particularly when it was partly subsidized by the United States. Its success continued with the improved version, the Tiger II, so much so that in all more than 2600 examples of all versions of the F-5 came of the production lines with a few of them still flying nowadays in some air forces, thanks to the various update programs which have permitted air forces to envisage prolonging their use until 2015-20.

Northrop F-5 Case Study in Aircraft Design William G. Stuart,1978

Northrop F-5/F-20/T-38 Frederick A. Johnsen,2006 In the late 1950s, an era when some Cold War allies still flew cast-off World War II propeller-driven bombers and fighters, Northrop seized on the need to deliver modern warplanes with modest maintenance requirements. The shapers of American foreign policy needed an economical way to give allies supersonic performance. The U.S. Air Force and Navy only tangentially used the F-5, but decades of new American fliers honed their skills on the similar T-38 variant, a high-performance training aircraft. The F-5, an all-out air superiority fighter, possesses remarkable performance to match its classy good looks. It has served U.S. allies (and a few former allies like Iran) for decades. Many still fly, including F-5Es, F-5Fs, and modified F-5Ns used by the U.S. Navy as aggressor training aircraft at its famous Top Gun school. The T-38 carries the sleek lines into the training world. And the powerful single-engine F-20, the ultimate iteration of this Northrop line, brought the basic F-5 premise forward into a new era. Vintage and modern photos in this WarbirdTech volume depict F-5s, T-38s, and the few F-20s in many guises; technical drawings and detail photos show the inner workings. Declassified documents illuminate the story of USAF F-5s combat-tested in Vietnam. Color photos capture variations in camouflage and markings since 1959. The enduring story of the Northrop F-5 series and the aircraft it spawned is overdue and timely for an audience that increasingly seeks reliable information and photos about Cold War aircraft.

There's a Bomb in My Luggage G.P. Huffman,2016-09-20 A Cambridge man wakes to find his home rendered strange, as if everything in it has been moved a fraction of a centimeter while he slept. In an irrational state he flees to the nearby international airport and purchases a ticket, certain that he is outrunning some horribly present danger. At the security checkpoint, the scanner's monitor clearly displays a cylindrical bomb in his carry-on luggage, a bag that he hastily had packed with traveling essentials and has at no point in memory left out of sight. The smiling security officers seem to be waving him through ...

F-5 Illustrated Lou Drendel,2020-03-28 The Northrop F-5 series is one of the longest-serving fighters in the world. The Freedom Fighter was the first 'lightweight fighter and the first international fighter serving in air forces throughout the free world. The F-5 Tiger II is even more prolific and is still in service with USAF and US Navy aggressor squadrons. The T-38 Talon was derived from the original NF-156 design that produced the Freedom Fighter. The T-38 has trained over 70,000 USAF pilots and is still in service 60 years after its first flight. It is still used by NASA and others. This book contains dozens of very high resolution color photos from the remarkable collection of Gerrit Kok as well as official DOD photos. It covers all the air forces that flew the F-5 series.

COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence Paul T. P. Wong, Claude-Hélène Mayer, Gökmen Arslan, In the era of COVID-19, many people have suffered high levels of stress and mental health problems. To cope with the widespread of suffering (physical, psychological, social, and economical) the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing. Other approaches such as Viktor Frankl’s theory of self-transcendence provide a promising framework for research and intervention on how to achieve resilience, wellbeing, and happiness through overcoming suffering and self-transcendence. The existential positive psychology of suffering complements the positive psychology of happiness, which is championed by Martin Seligman, as two equal halves of the circle of wellbeing and optimal mental health. This Research Topic aims to examine the different approaches to Positive Psychology and their influence on individual wellbeing during the COVID-19 era. One of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions, such as shame, guilt, and anger, as well as the dialectical process of balancing negative and positive emotions. As an example, based on all the empirical research and Frankl’s self-transcendence model, Wong has developed the existential positive psychology of suffering (PP2.0) as the foundation for flourishing. Here are a few main tenets of PP2.0: (1) Life is suffering and a constant struggle throughout every stage of development, (2) The search for self-transcendence is a primary motive guided by the meaning mindset and mindful mindset. (3) Wellbeing cannot be sustainable without overcoming and transforming suffering. In this Research Topic we welcome diverse approaches discussing the following points: • The dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self-transcendence; • The role of self-transcendence in resilience, virtue, meaning, and happiness; • The upside of negative emotions; • The new science of resilience based on cultivating the resilient mindset and character; • How to make the best use of suffering to achieve out potentials & mental health.
