Doing Physics with Scientific Notebook Joseph Gallant,2012-03-05 The goal of this book is to teach undergraduate students how to use Scientific Notebook (SNB) to solve physics problems. SNB software combines word processing and mathematics in standard notation with the power of symbolic computation. As its name implies, SNB can be used as a notebook in which students set up a math or science problem, write and solve equations, and analyze and discuss their results. Written by a physics teacher with over 20 years experience, this text includes topics that have educational value, fit within the typical physics curriculum, and show the benefits of using SNB. This easy-to-read text: Provides step-by-step instructions for using Scientific Notebook (SNB) to solve physics problems Features examples in almost every section to enhance the reader's understanding of the relevant physics and to provide detailed instructions on using SNB Follows the traditional physics curriculum, so it can be used to supplement teaching at all levels of undergraduate physics Includes many problems taken from the author's class notes and research Aimed at undergraduate physics and engineering students, this text teaches readers how to use SNB to solve some everyday physics problems.

Conductors and Composers of Popular Orchestral Music Naomi Musiker,Reuben Musiker,2014-02-25 World-wide in scope and focusing on the second half of the 20th century, this work provides biographies and discographies of some 500 composers and conductors of light and popular orchestral music, including film, show, theatre and mood music. The book is arranged in two sequences: 1) Biographies and select discographies, both arranged alphabetically, of the well-known and better-known conductors and composers. These entries also include a list of suggested reading for those wishing to further their studies; and 2) Select discographies of conductors about whom little or no biographical information is available. The bibliography at the end of the book covers discographical sources, popular music and film music.

This is the first time that the lives and recordings of such artists as Kostelanetz, Faith, and Gould as well as the orchestral recordings of such great popular composers as Gershwin, Kern, Porter, Rodgers, Berlin and Coward have been documented and presented in an encyclopedic form.
