**Murder in Peekskill** Glen C. Carrington,2012-07-13 Murder in Peekskill is a story about who murdered the youngest daughter of prominent New York Senator, James Benjamin McThellan, and his beautiful wife, Barbara Baker Adams-McThellan. The body of Abigail Ruth, the youngest daughter of three siblings, was discovered in the murky waters of a pond at a local popular park in the City of Peekskill after the first warm weather started melting the winter snow. A maintenance worker discovered the remains and immediately alerted authorities. The McThellan family initially hires a familiar private investigations firm to handle the search for their then missing daughter who mysteriously vanishes after going to visit a friend. But a missing person case evolves into a homicide after the remains are discovered. There are three potential suspects two former high school friends of the deceased are nationally recognized athletes a NFL running back who was in the same high school class as Abigail and a former boyfriend who was two years her senior and also one of the top ten marathoners in the country. The third immediate suspect was Abigails latest male friend, an aspiring New York City actor who also happens to be the son of an alleged Mafia boss. The investigation by the private firm is not yielding any informative information leading to the identity of the murderer and Barbara Baker, after finding her daughters diary, now distrusts whether she is getting a full disclosure from

the private firm. With her suspicions now sufficiently aroused, she now encourages additional investigative resources to be employed and wants Detective Lincoln...the sleuth who found fame by solving the famous or infamous Oakland Hills Vodou Hills Murders. There is a litany of personalities that the detective must contend with to uncover the layers of comments, facts, and observations to make informed decisions to stumble forward in an intriguing and interesting mystery to find out the truth and hopefully...administer justice!

Introduction to the Finite Element Method and Implementation with MATLAB® Gang Li, 2020-07-30 Connecting theory with numerical techniques using MATLAB®, this practical textbook equips students with the tools required to solve finite element problems. This hands-on guide covers a wide range of engineering problems through nine well-structured chapters including solid mechanics, heat transfer and fluid dynamics; equilibrium, steady state and transient; and 1-D, 2-D and 3-D problems. Engineering problems are discussed using case study examples, which are solved using a systematic approach, both by examining the steps manually and by implementing a complete MATLAB® code. This topical coverage is supplemented by discourse on meshing with a

detailed explanation and implementation of 2-D meshing algorithms. Introducing theory and numerical techniques alongside comprehensive examples this text increases engagement and provides students with the confidence needed to implement their own computer codes to solve given problems.

GAME ON! The time has come for Fayte to create a guild—the first one in Age of Gods. But creating a guild is a lot easier said than done, especially when the place Fayte wants to create hers is the most dangerous location currently within the game. Stampede. The term refers to an event that happens when humans leave the city and a horde of monsters gathers to attack them. It's guaranteed to happen while their sect is being built, which means it is up to Adam, Aris, Fayte, Kureha, Lilith, Susan, and Titania to defend the construction workers while they build it. But how can they defend anything when faced with hundreds of monsters all above level 30?
