*Multiway Contingency Tables Analysis for the Social Sciences* Thomas D. Wickens, 2014-02-25  
This book describes the principles and techniques needed to analyze data that form a multiway contingency table. Wickens discusses the description of association in such data using log-linear and log-multiplicative models and defines how the presence of association is tested using hypotheses of independence and quasi-independence. The application of the procedures to real data is then detailed. This volume does not presuppose prior experience or knowledge of statistics beyond basic courses in fundamentals of probability and statistical inference. It serves as an ideal reference for professionals or as a textbook for graduate or advanced undergraduate students involved in statistics in the social sciences.

Computational Modelling of Concrete Structures Gunther Meschke, René de Borst, Herbert Mang, Nenad Bicanic, 2006-03-16  
This conference proceedings brings together the work of researchers and practising engineers concerned with computational modelling of complex concrete, reinforced concrete and prestressed concrete structures in engineering practice. The subjects considered include computational mechanics of concrete and other cementitious materials, including masonry. Advanced discretisation methods and microstructural aspects within multi-field and multi-scale settings are discussed, as well as modelling formulations and constitutive modelling frameworks and novel experimental programmes. The conference also considered the need for reliable, high-quality analysis and design of concrete structures in regard to safety-critical structures, with a view to adopting these in codes of practice or recommendations. The book is of special interest to researchers in computational mechanics, and industry experts in complex nonlinear simulations of concrete structures.

Corporatesocialresponsibility,ethicsandsustainableprosperity Boubaker Sabri,Nguyen Duc Khuong,2019-06-06 Corporate activities are not only drivers of economic growth but also key actors of the changes towards more sustainable markets and environment as well as inclusive development. Significant efforts have recently been devoted to transform private and public firms alike from pure economic-oriented organizations to entities that deliberately and diligently create value without neglecting social and environmental implications of their activities. Firm performance, resilience,

and survival are nowadays, more than ever before, dependent on how they consciously and purposefully engage in appropriate corporate social responsibility (CSR) strategies and actions. This book, *Corporate Social Responsibility, Ethics and Sustainable Prosperity*, will provide all readers, including investors, managers, lawmakers, and policymakers with an up-to-date, comprehensive, and thoughtful coverage of CSR and ethical issues at the crossroads of different finance and management disciplines. It contains a rich collection of insightful studies covering a wide range of topics in corporate ethics, CSR, and sustainable prosperity. Together, these studies help readers deepen their knowledge on different country environments and various organizational forms, policies, and activities. The book is composed of 16 chapters which are divided into two interconnected parts: Part I addresses ESG and ethical issues in corporate decision-making, while Part II provides insights towards sustainable prosperity.

Problems and Solutions in Biological Sequence Analysis Mark Borodovsky, Svetlana Ekisheva, 2006-09-04 This book is the first of its kind to provide a large collection of bioinformatics

problems with accompanying solutions. Notably, the problem set includes all of the problems offered in Biological Sequence Analysis, by Durbin et al. (Cambridge, 1998), widely adopted as a required text for bioinformatics courses at leading universities worldwide. Although many of the problems included in Biological Sequence Analysis as exercises for its readers have been repeatedly used for homework and tests, no detailed solutions for the problems were available. Bioinformatics instructors had therefore frequently expressed a need for fully worked solutions and a larger set of problems for use on courses. This book provides just that: following the same structure as Biological Sequence Analysis and significantly extending the set of workable problems, it will facilitate a better understanding of the contents of the chapters in BSA and will help its readers develop problem-solving skills that are vitally important for conducting successful research in the growing field of bioinformatics. All of the material has been class-tested by the authors at Georgia Tech, where the first ever MSc degree program in Bioinformatics was held.

**Charged-Particle Reaction List 1948-1971** F McGowan,2012-12-02 Charged-Particle Reaction List 1948-1971 is a guide to experiments on charged-particle-induced reactions that have been reported in journal literature during the period 1948 to June 1971. This compendium consists of the material from four Reaction Lists which have already appeared in Nuclear Data Tables. Each published article is listed under the target nuclei in the nuclear reactions which it treats. Reactions are denoted by  $A(a,b)B$ , where A and B are the target and residual nucleus, respectively; a is the bombarding charged particle and b is the outgoing product particle or particles. The guide also includes a brief information after the reaction designation, namely, the energy E of the bombarding projectile in MeV, a short statement of the type of data that is found in the paper, and a

bibliographic information on the paper itself. A symbol THY in the extreme right-hand column denotes the theoretical papers concerned with analysis of nuclear reaction data. For papers dealing with experimental data on energy spectra, the angle of observation of the emerging reaction products, the accelerator, as well as the detector used are given for many entries under the column heading Quantity Measured. The guide will prove immensely useful for theoretical physicists, nuclear physicists, and molecular physicists.
