1089 and All that D. J. Acheson, 2002 This excellent book, written by the established author David Acheson, makes mathematics accessible to everyone. Providing an entertaining and witty overview of the subject, the text includes several fascinating puzzles, and is accompanied by numerous illustrations and sketches by world famouscartoonists. This unusual book is one of the most readable explanations of mathematics available.

The Curious Incident of the Dog in the Night-Time Mark Haddon,2009-02-24 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

The Sufi and the Friar Minlib Dallh,2017-07-19 An investigation of the spiritual encounter between a twentieth-century Dominican friar and an eleventh-century Afghani Sufi master. This book explores the profound spiritual encounter between Serge de Beaurecueil (1917 2005), a twentieth-century French Dominican friar and Christian mystic, and the eleventh-century ?anbal? Sufi master Khw?ja 2 Abdull?h An??r? of Her?t (1006 1089). De Beaurecueil lived much of his Christian discipleship in Cairo and Afghanistan, where he became the foremost expert on the life and thought of An??r?. His mystical conversation and scholarly engagement with An??r?, his experience of Islamic hospitality, and the transformation of his own practical spirituality or praxis mystica through his experience of dwelling in the abode of Islam provide us with not only a magnificent and luminous meditation on the hidden and abiding presence of God among Muslims but also a contemplation on the quandary of genuine engagement with and openness to the religious other. 2 To place a French Dominican friar who died in 2005 and a Sufi who died in 1089 in juxtaposition in the same book is not the most obvious path in comparative religious scholarship. Yet Dallh has not only done precisely that, but he has also produced a brilliant monograph in the process which makes for a fascinating read. Dallh 3 s work exhibits painstaking scholarship which illuminates two notable figures in Christianity and Islam respectively and makes an original contribution to the study of these two great faith traditions. 2 In Richard Netton, author of Islam, Christianity and Tradition: A Comparative Exploration

Engineering Turbulence Modelling and Experiments - 4 D. Laurence, W. Rodi, 1999-04-14 These proceedings contain the papers presented at the 4th International Symposium on Engineering Turbulence Modelling and Measurements held at Ajaccio, Corsica, France from 24-26 May 1999. It follows three previous conferences on the topic of engineering turbulence modelling and measurements. The purpose of this series of symposia is to provide a forum for presenting and discussing new developments in the area of turbulence modelling and measurements, with particular emphasis on engineering-related problems. Turbulence is still one of the key issues in tackling engineering flow problems. As powerful computers and accurate numerical methods are now available for solving the flow equations, and since engineering applications nearly always involve turbulence effects, the reliability of CFD analysis depends more and more on the performance of the turbulence models. Successful simulation of turbulence requires the understanding of the complex physical phenomena involved and suitable models for describing the turbulent momentum, heat and mass transfer. For the understanding of turbulence phenomena, experiments are indispensable, but they are equally important for providing data for the development and testing of turbulence models and hence for CFD software validation.

Vacant Possession Hilary Mantel,2010-08-31 Ten years have passed since Muriel Axon was locked away for society's protection, but psychiatric confinement has only increased her malice and ingenuity. At last free, she sets into motion an intricate plan to exact revenge on those who had her put away. Her former social worker, Isabel, and her old neighbors have moved on, but Muriel, with her talent for disguise, will infiltrate their homes and manipulate their lives, until all her enemies are brought together for a gruesome finale. Hilary Mantel's razor-sharp wit animates every page of this darkly comic tale of retribution.
