Sustainable Forest Management Klaus von Gadow,Timo Pukkala,Margarida Tomé,2012-12-06
During its 200-year history the concept of sustainable forest ecosystem management has been the object of scientific and political discussion, with varying degrees of intensity - promoted with

vehement fervour during periods of social or economic crisis, and less intensely during periods of stability. This volume, which forms part of the book series Managing Forest Ecosystems, presents state-of-the-art contributions presented by 9 leading authors from North America, Europe, Australia, and Southern Africa. If technical knowledge is a constraint to the implementation of sustainable management, this book contains a wealth of information which may be useful to students and practitioners alike. The specific target readership includes company management, the legal and policy environment, and forestry administrators. This book's unique feature is its holistic approach which includes ecological, socio-political, and timber supply issues.
