

T 1648

Thomas Carlyle

The Myth of 1648 Benno Teschke, 2020-05-05 Winner of the 2003 Isaac and Tamara Deutscher Memorial Prize This book rejects a commonplace of European history: that the treaties of Westphalia not only closed the Thirty Years' War but also inaugurated a new international order driven by the interaction of territorial sovereign states. Benno Teschke, through this thorough and incisive critique, argues that this is not the case. Domestic 'social property relations' shaped international relations in continental Europe down to 1789 and even beyond. The dynastic monarchies that ruled during this time differed from their medieval predecessors in degree and form of personalization, but not in underlying dynamic. 1648, therefore, is a false caesura in the history of international relations. For real change we must wait until relatively recent times and the development of modern states and true capitalism. In effect, it's not until governments are run impersonally, with no function other than the exercise of its monopoly on violence, that modern international relations are born.

SME Mineral Processing and Extractive Metallurgy Handbook Courtney A. Young, 2019-02-01 This landmark publication distills the body of knowledge that characterizes mineral processing and extractive metallurgy as disciplinary fields. It will inspire and inform current and future generations of minerals and metallurgy professionals. Mineral processing and extractive metallurgy are atypical disciplines, requiring a combination of knowledge, experience, and art. Investing in this trove of valuable information is a must for all those involved in the industry—students, engineers, mill managers, and operators. More than 192 internationally recognized experts have contributed to the handbook's 128 thought-provoking chapters that examine nearly every aspect of mineral processing and extractive metallurgy. This inclusive reference addresses the magnitude of traditional industry topics and also addresses the new technologies and important cultural and social issues that are important today. Contents Mineral Characterization and Analysis Management and Reporting Comminution Classification and Washing Transport and Storage Physical Separations Flotation Solid and Liquid Separation Disposal Hydrometallurgy Pyrometallurgy Processing of Selected Metals, Minerals, and Materials
