[P] **NEURAL NETWORK COMPUTING FOR THE ELECTRIC POWER INDUSTRY** Dejan J. Sobajic,2013-06-17 Power system computing with neural networks is one of the fastest growing fields in the history of power system engineering. Since 1988, a considerable amount of work has been done in investigating computing capabilities of neural networks and understanding their relevance to providing efficient solutions for outstanding complex problems of the electric power industry. A principal objective of a power utility is to provide electric energy to its customers in a secure, reliable and economic manner. Toward this aim, utility personnel are engaged in a variety of activities in areas of supervisory control and monitoring, evaluation of operating conditions, operation planning and scheduling, system development, equipment testing, etc. Over the past decades significant advances have been made in the development of new concepts, design of hardware and software systems, and implementation of solid-state devices which all contributed to the steadily improving power system performance that we are experiencing today. Advanced information processing technologies played an important role in these development efforts. Members of the Special Interest Group for Power Engineering of the INNS recognized the need for bringing together leading researchers in the field of neurocomputing with experts from power utilities and manufacturing companies to assess the current state of affairs and to explore the directions of further research and practice. This book is based on The Summer Workshop on Neural Network Computing for the Electric Power Industry which brought together approximately forty specialists with backgrounds in power engineering, system operation and planning, neural network theory and AI systems design. An informal and highly inspiring atmosphere of the workshop facilitated open discussion and exchange of expertise between the participants.
 [P] **THE MANAGEMENT OF THE NATIONAL DEBT OF THE UNITED KINGDOM 1900-1932** Jeremy Wormell,2002-09-11 This impressive and pioneering work describes and analyses the management of the national debt of the United Kingdom from the Boer War (1899-1902) to the period of the Great Depression in the early 1930s. It therefore spans the expansion of the debt during the Great War of 1914-18 and the struggle to bring its structure and cost under control in the decade and a half following Armistice. The Management of the National Debt in the United Kingdom is the first definitive work on the subject. Using an impressive array of research, from archives and unpublished material, Jeremy Wormell has brought together material that is unavailable in any other form. It will be an invaluable resource for political and economic historians, as well as economists in general, civil servants, bankers and financial journalists.

 [P] **WELDING OF TUBULAR STRUCTURES** Yong Zhou,2016-08-09 Welding of tubular structures focuses on the testing, processes, and techniques involved in welding tubular structures in different environments and conditions. The book stresses that the analysis of weldment testing is valuable to the structural integrity of every welded material. Presenting the literature of various authors who have conducted experiments and tests on this topic, the book starts by outlining the testing measures done on weldments on offshore structures, hangars, towers, and other edifices. These discussions are backed up by numerical representations to support the claims of authors, particularly on the effectiveness of the techniques used in welding. The book also presents a comparative study on the behavior of steel, aluminum, and other materials when subjected to stress. This discussion is followed by experiments to test the strength of the welded materials. Much attention is given when these materials start to crack and suffer from fatigue. With this in consideration, analysis is particularly devoted to the research on why these welded materials fail. The text is a vital source of information to those in the welding sector, particularly those working in offshore structures.
