Death and Changing Rituals J. Rasmus Brandt,Hîkon Ingvaldsen,Marina Prusac,2014-07-31 The forms by which a deceased person may be brought to rest are as many as there are causes of death. In most societies the disposal of the corpse is accompanied by some form of celebration or ritual which may range from a simple act of deportment in solitude to the engagement of large masses of people in laborious and creative festivities. In a funerary context the term ritual may be taken to represent a process that incorporates all the actions performed and thoughts expressed in connection with a dying and dead person, from the preparatory pre-death stages to the final deposition of the corpse and the post-mortem stages of grief and commemoration. The contributions presented here are focused not on the examination of different funerary practices, their function and meaning, but on the changes of such rituals _ how and when they occurred and how they may be explained. Based on case studies from a range of geographical regions and from different prehistoric and historical periods, a range of key themes are examined concerning belief and ritual, body and deposition, place,

performance and commemoration, exploring a complex web of practices.

The Social Benefits of Education Jere R. Behrman,Nevzer Stacey,2010-08-04 For decades, the primary argument in justifying education has been based on its direct economic effects. Yet education also provides social benefits for individuals and society at large, including a better way of taking care of ourselves, and consequently creating a better society to live in. Though it is difficult to quantify these social benefits, a more systematic analysis would improve our understanding of the full effects of education and provide a basis for considering related policies. The Office of Research of the United States Department of Education commissioned a series of papers on measuring these effects of education. Those papers, revised and updated, are collected here. Kenneth J. Arrow provides perspective on education and preference formation, and Jere R. Behrman considers general conceptual and measurement issues in assessing the social benefits of education and policies related to education. These

issues are taken up by experts in four fields--health, parenting, the environment, and crime. Themes addressed include measurement issues regarding what we mean by education and its benefits; basic analytical issues in assessing the impact of education on these social benefits using behavioral data; and whether the social benefits of education justify public policy interventions. Jere R. Behrman is William R. Kenan Jr. Professor of Economics, University of Pennsylvania. Nevzer G. Stacey is Senior Research Analyst, Office of Educational Research, U.S. Department of Education.
