*Understanding Psychosocial Adjustment to Chronic Illness and Disability* Dr. Elizabeth Da Silva Cardoso, PhD,Dr. Julie A. Chronister, PhD,2009-06-16 Rehabilitation practitioners face the difficult task of helping clients adjust to chronic illness or disability. This can be a long and trying process for both practitioner and client. With this handbook, however, practitioners and students can gain a wealth of insight into the critical issues clients face daily. This book presents the dominant theories, models, and evidence-based techniques necessary to help the psychosocial adjustment of chronically ill or disabled persons. Each chapter is written from an evidence-based practice (EBP) perspective, and explores how important issues (i.e., social stigma, social support, sexuality, family, depression, and substance abuse) affect persons adjusting to chronic illness and disability. Key features include: A review of psychopharmacological treatment options for depression, anxiety, and other disorders coinciding with rehabilitation The effect of rehabilitation on the family, including key family intervention strategies Strategies for using positive psychology and motivational interviewing in rehabilitation Multiculturalism and the effect of culture on the adjustment process Ancillary materials including an instructor's manual with a syllabus, examination items, PowerPoint presentation, and answers to class exercises By incorporating research-based knowledge into clinical rehabilitation practice, health care professionals can ensure that people with chronic illness and disability receive only the best treatment.

VHF Radio Propagation Data for the Cedar Rapids - Sterling, Anchorage - Barrow, and Fargo - Churchill Test Paths George R. Sugar,Kenneth W. Sullivan,1960 During the past nine years numerous studies of WHF ionospheric scatter propagation have been performed at the National Bureau of Standards and many of the results of this extensive program of research have already been published. However, thus far there has not been any publication of most of the basic signal strength data taken during the program. This note, containing the basic observations for some of the experimental paths, has been prepared in order to make these basic data readily available to those concerned with studies of ionospheric propagation.

Receptor Tyrosine Kinases: Family and Subfamilies Deric L. Wheeler,Yosef Yarden,2015-07-31 This book devotes a chapter to each RTK family and the multiple receptors within each family, thoroughly covering all of the RTKs. The chapters all follow the same structure, presenting this essential information in an accessible and user-friendly format. Each chapter covers one specific family of receptors and begins with a general introduction to that family and a comprehensive discussion of that receptor's family in development and human disease. Following are in-depth analyses of each family's receptors with discussions on the gene, protein, ligands, activation, and signaling pathways along with discussion of receptor processing and signal attenuation. Further, cross talk with other receptors systems, post-translational modification and specific unique characteristics to each RTK are discussed. Because it

isolates and explains each family, this book is an essential companion volume to Receptor Tyrosine Kinases: Structure, Functions and Role in Human Disease, by the same authors, which talks about RTKs more generally and without the family-by-family detail.
