Delta Squad - The Rise Of 188 Jesse Wilson,2022-02-07 The power of a god is bestowed on a madman, his eyes glowing with a golden light through an arcane ritual from ages past. Together with a group of insane generals, he is dedicated to wage war on the world, with an army of remorseless killers that can appear anywhere on the planet. They take no prisoners, and no one is safe. Meanwhile, a top-secret organization known only to the highest levels of power is coming up with its greatest weapon: the mythical Delta Squad. A five-member team with special skills, weapons and armor, they are destined to fight in what could be the last war. But will it be enough to put an end to the madness... or is

the rise of the sinister power only known as 188 impossible to stop?

The Middle Power Project Adam Chapnick,2011-11-01 The Middle Power Project describes a defining period of Canadian and international history. During the Second World War, Canada transformed itself from British dominion to self-proclaimed middle power. It became an active, enthusiastic, and idealistic participant in the creation of one of the longest lasting global institutions of recent times – the United Nations. This was, in many historians' opinions, the beginning of a golden age in Canadian diplomacy. Chapnick suggests that the golden age may not have been so

lustrous. During the UN negotiations, Canadian policymakers were more cautious than idealistic. The civil service was inexperienced and often internally divided. Canada's significant contributions were generally limited to the much neglected economic and social fields. Nevertheless, creating the UN changed what it meant to be Canadian. Rightly or wrongly, from the establishment of the UN onwards, Canadians would see themselves as leading internationalists. Based on materials not previously available to Canadian scholars, The Middle Power Project presents a critical reassessment of the traditional and widely accepted account of Canada's role and interests in the formation of the United Nations. It will be read carefully by historians and political scientists, and will be appreciated by general readers with an interest in Canadian and international history.

VHF Radio Propagation Data for the Cedar Rapids – Sterling, Anchorage – Barrow, and Fargo – Churchill Test Paths George R. Sugar, Kenneth W. Sullivan, 1960 During the past nine years numerous studies of WHF ionospheric scatter propagation have been performed at the National Bureau of Standards and many of the results of this extensive program of research have already been published. However, thus far there has not been any

publication of most of the basic signal strength data taken during the program. This note, containing the basic observations for some of the experimental paths, has been prepared in order to make these basic data readily available to those concerned with studies of ionospheric propagation.
