Low Latitude Aeronomical Processes A. P. Mitra, 2013-10-22 Low Latitude Aeronomical Processes contains the papers presented at the symposium on Low Latitude Aeronomical Processes, held in Bangalore, India in May and June 1979. The conference focuses on the discussion and exchange of scientific studies on low latitude aeronomy, of which India is one of the main practitioners. The presentations contained in the book cover areas of study in equatorial electrojet, electric field, and electric current; low latitude middle atmosphere; and low latitude ionosphere above 100 km. Trans-ionospheric propagation in the equatorial regions and stratospheric chemistry and sun-weather relationships for low latitude regions, as well as a discussion on incoherent and coherent scatter observations at low latitude, are encompassed as well. Atmospheric physicists and researchers will find this book an interesting read.

John J. Pershing and the American Expeditionary Forces in World War I, 1917-1919

John T. Greenwood, 2021-09-07 General of the Armies John J. Pershing (1860–1948) had a long and distinguished military career, but he is most famous for leading the American Expeditionary Forces in World War I. He published a memoir, *My Experiences in the World War*, and has been the subject of numerous biographies, but the literature regarding this towering figure and his enormous role in the First World War deserves to be expanded to include a collection of his wartime correspondence. Meticulously edited by John T. Greenwood, volume 1 of *John J. Pershing and the American Expeditionary Forces in World War I, 1917–1919* covers the period of April 7 through September 30, 1917. The letters speak to such topics as Pershing's appointment to command the US expeditionary force, his initial preparations, and early meetings with Allied civilian and military leaders, including Field Marshal Sir Douglas Haig and General Henri Philippe Pétain. Drawing heavily on Pershing's extensive personal papers, this collection includes his letters and cablegrams exchanged with Secretary of War Newton D. Baker and Chiefs of Staff Hugh L. Scott and Tasker H. Bliss. Extracts from the large volume of rarely referenced cablegrams represent an important contribution to Pershing's wartime story. Two appendices provide the reader with details of Pershing's relations with the Allied governments and armies (as he reported them in an unpublished part of his Final Report of Gen. John J. Pershing in 1920) and his personal appraisal of Marshal Ferdinand Foch as he knew him during the war. These volumes of wartime correspondence provide new insight into the work of a legendary soldier and the historic events in which he participated, and offer a valuable resource for any serious Pershing or World War I

scholar.

Foundations of Taxation Law 2022 Stephen Barkoczy, 2022-01-25 Foundations of Taxation Law provides a clear and comprehensive introduction to the policy, principles and practice underpinning the Australian taxation system. Designed as an introductory guide for law and business students as well as tax practitioners, the text focuses on general principles, blending policy issues, taxation theory, technical 'black letter law' and commercial practice into a succinct, principled text. Topics have been developed in a logical, structured order and are cross-referenced to specific provisions in the legislation and relevant cases so that readers can easily find the source of the law. The text includes approximately 400 examples and dozens of diagrams and tables that condense the law and clarify difficult concepts. This fourteenth edition has been substantially revised and restructured to take account of many important legislative reforms, case law developments, administrative changes and policy announcements. It is designed to be used in conjunction with the Core Tax Legislation and Study Guide 2022.

Energy Dissipators and Hydraulic Jump Willi H. Hager, 2013-03-09 Stilling basins utilizing a hydraulic jump for energy dissipation are widely used in hydraulic engineering. Da Vinci was the first to describe the hydraulic jump, and Bidone conducted classical experiments about 170 years ago. Stilling basins were developed in the thirties with significant design improvements being made during the last sixty years. Although well-established guidelines for a successful design are presently available, the information for the design of such dissipators is not yet compiled in book form. This book provides state-of-the-art information on hydraulic jumps and associated stilling basins. A large number of papers on the topics are reviewed. The present trends of the art of designing a stilling basin are discussed and ideas for future research are outlined. Design criteria and recommendations are frequently given. However, this should not be considered as a ready-to-use guideline since the design of an effective stilling basin is much more complex than following general design steps. The book is divided into two parts. Part 1 on hydraulic jumps is comprised of chapters 2 to 5. Part 2 consisting of chapters 6 to 14 deals with various hydraulic structures used to dissipate energy. The lists of notation and references are provided in each part separately although the same notation is used throughout.
