Information Modelling and Knowledge Bases XXIII J. Henno, Y. Kiyoki, T. Tokuda, 2012-01-18 Information modelling and knowledge bases have become hot topics, not only in academic communities concerned with information systems and computer science, but also wherever information technology is applied in

the world of business. This book presents the proceedings of the 21st European-Japanese Conference on Information Modelling and Knowledge Bases (EJC 2011), held in Tallinn, Estonia, in June 2011. The EJC conferences provide a worldwide forum for researchers and practitioners in the field to exchange results and experiences achieved in computer science and related disciplines such as conceptual analysis, design and specification of information systems, multimedia information modelling, multimedia systems, software engineering, knowledge and process management, cross cultural communication and context modelling. Attention is also paid to theoretical disciplines including cognitive science, artificial intelligence, logic, linguistics and analytical philosophy. The selected papers (16 full papers, 9 short papers, 2 papers based on panel sessions and 2 on invited presentations), cover a wide range of topics, including database semantics, knowledge representation, software engineering, www information management, context-based information retrieval, ontology, image databases, temporal and spatial databases, document data management, process management, cultural modelling and many others. Covering many aspects of system modelling and optimization, this book will be of interest to all those working in the field of information modelling and knowledge bases.

*Foundations of Taxation Law 2022* Stephen

Barkoczy, 2022-01-25 *Foundations of Taxation Law* provides a clear and comprehensive introduction to the policy, principles and practice underpinning the Australian taxation system. Designed as an introductory guide for law and business students as well as tax practitioners, the text focuses on general principles, blending policy issues, taxation theory, technical 'black letter law' and commercial practice into a succinct, principled text. Topics have been developed in a logical, structured order and are cross-referenced to specific provisions in the legislation and relevant

cases so that readers can easily find the source of the law. The text includes approximately 400 examples and dozens of diagrams and tables that condense the law and clarify difficult concepts. This fourteenth edition has been substantially revised and restructured to take account of many important legislative reforms, case law developments, administrative changes and policy announcements. It is designed to be used in conjunction with the Core Tax Legislation and Study Guide 2022.
