The Doctorate 1957-1962 Tannie Stovall, 2011-06-22 This novel relates the life of Thomas Tims also known as Big T between 1957 and 1962. At the beginning of this period, he acquired a Bachelor of Science degree from a small southern African American college. At the end, he began his first professional position after obtaining a PhD degree from the University of Minnesota in Nuclear Physics. The novel begins at Thomas’ college graduation, where we learn that during his four years at college he did not sever ties with his low class background, which many at his college, students and faculty, looked upon with varying degrees of concern. They noted his disregard for social norms and his sexual licentiousness and feared that they might lead to his ruin in addition to tarnishing the reputation of his alma mater. Nevertheless, in the fall after his graduation, he entered the University of Minnesota Graduate School in Physics with a strong belief in the American dream and in his eventual success. However, it became evident that his fellow physics students, who mostly came from prestigious northern colleges were better prepared than he and their social culture was different from his. He was besieged with loneliness and fears that maybe he was inferior, morally and intellectually, to his white colleagues. Partially out of desperation he married an African American girl, with whom he separated while she was pregnant for a white mistress, Barbara Goodbody. During Thomas’ stay at Minnesota, a vigorous debate was taking place in the United States on the position of African Americans in the country. Thomas entered this debate with other African Americans. The African Americans on campus were divided among those who were for complete assimilation of African Americans in the existing American society, others who sought both assimilation and a revolutionary improved American society and others who wanted complete separation of the two groups including division of the territory. Questions of current interracial relationships along with assorted difficulties of African Americans matriculating in predominantly white institutions were frequently discussed. When Thomas was close to graduation and looking for employment, it became clear to him, that having a white companion or wife would severely limit their opportunities. After suffering a serious frustration crisis, he made an extraordinary gesture to prove his love for Barbara then left her.

The Summer of 1957 Judith E. Powell, 2021-01-29 In the summer of 1957, eight-year-old Penelope Evans was sexually molested. Two months later, the man who molested her was found dead in his car from a gunshot wound to the head. It was ruled a suicide. Now, thirty-six years later, Elizabeth Scott—the granddaughter of the dead man and a police investigator—wonders why her beloved grandfather would commit suicide. Elizabeth is intent on finding out if it really was suicide or if he was actually murdered. Unaware of Penelope’s experience in 1957, Elizabeth asks her former childhood friend to help get the case reopened. Penelope refuses, and after secretly reading her mother’s diary, she is determined to keep Elizabeth from reopening the case. As these two women move forward on divergent paths, Elizabeth discovers unfathomable secrets her family has kept from her. Penelope is forced to confront her past as her current life unravels. Both women are faced with life-changing decisions that will affect their lives and the people they love most.

Dynamics of Satellites / Dynamique des Satellites Maurice Roy, 2013-04-17 Depuis le lancement de SPOUTNIK I par l’Union Soviétique le 4 octobre 1957, des expériences humaines de mécanique céleste de cette sorte ont été répétées et de nombreuses reprises en U.R.S.S. et aux U.S.A. En 1961, sur ma proposition, l’Union Internationale de Mécanique Céleste et Appliquée retint l’idée de consacrer en 1962 un Symposium spécial et la confrontation des résultats des expériences soviétiques et américaines en vue d’en tirer le maximum d’enseignements sur la question fondamentale suivante concernant la {laquo} dynamique des satellites artificiels de la Terre: quelles sont la nature et les lois des forces réelles qui agissent sur ces mobiles au voisinage de notre planète, et qui déterminent par conséquent leur mouvement~ En d’autres termes, il s’agissait de faire le point de nos connaissances sur le problème du mouvement des astres, magistralement résolu par Newton il y a plus de trois siècles pour des astres quasi-ponctuels et assez éloignés. Les moyens d’observation utilisés pour connaître avec la meilleure précision possible le mouvement des satellites artificiels lancés depuis 1957, et le fait de la proximité relative de ces satellites par rapport à la Terre sont par eux-mêmes d’une nature et révéler soit des alterations de la loi classique de l’attraction newtonienne, dont la signification serait à rechercher, soit l’intervention de forces perturbatrices, dont l’origine et l’expression seraient à préciser.

Pioneers in Marketing D.G. Brian Jones, 2011-12-21 Pioneers in Marketing: A Collection of Biographical Essays discusses eight historically important marketing scholars whose careers collectively spanned over 100 years. An introductory chapter describes the role of biography in the study of marketing thought, and introduces the eight subjects in this collection. Subsequent chapters describe the lives of Edward David Jones, Simon Litman, Henry Charles Taylor, Percival White, George Burton Hotchkiss, Theodore N. Beckman, David D. Monieson, and William R. Davidson, focusing on their intellectual and professional contributions to the marketing discipline. The biographies are based on rare archival materials, some personal interviews, and analysis of the subjects’ major works. The final chapter draws lessons from the collection for marketing students and teachers. Several important discoveries are reported that suggest opportunities for further research. These stories will inform and inspire students of marketing.
