**Global Events and Event Stratigraphy in the Phanerozoic** Otto H.

Walliser,2012-12-06 The existence of rapid and even catastrophic turnovers within the Phanerozoic ecosystems has been discussed controversially for more than 170 years. Since 1980 this discussion has become even more intensive after the hypothesis of Alvarez, explaining the end-Cretaceous mass extinction as the result of a huge asteroid impact on the Earth. This theory stimulated several thousand papers and is still controversial. The international research programme on Global Biological Events in Earth History attempts to bring the discussion back to the facts by using multidisciplinary investigations of the major Phanerozoic events. The results of an international group of experts are presented giving a wealth of information and a thorough discussion of the causes of the various global events.

Andersson,2013-10-18 Managing Trade Relations in the New World Economy analyses the implications of the new world economy for global trade. **The Labour Party Since 1979** Eric u University of Stirling Shaw, 2002-01-22 The Labour Party since 1979: Crisis and Transformation challenges the claim that Labour's only real hope for the future lies in shedding its ideological baggage. It rejects the notion taht the 'shadow budget' was the prime cause of its 1992 defeat and argues that the strategyof seeking an image of 'responsibility' and 'respectability' - which under the new leadership has become a paramount concern - does not offer the best route forward for the

party. The effect of this strategy - of abandoning traditional tenets, and adopting a policy profile more to the tastes of its critics in business and the media - will be to deprive Labour of its sheet-anchor; and even if successful electorally, the price will be that the hopes and aspirations of its supporters will be highly unlikely to be fulfilled.

**Vertical Specialization and Trade Surplus in China** Wang Wei, 2013-05-09 The traditional flow of goods from primary production through to manufacturing and consumption has expanded across international borders conterminously with globalization. Vertical specialization (VS) in processing and manufacturing in China has driven export growth. In particular, intra-industry and intra-product trade between China, the US and East Asia has increased China's trade surplus over the long term. Vertical Specialization and Trade Surplus in China aims to measure the level of VS in the Chinese manufacturing industry to provide a more accurate representation of China's trade surplus, and gives empirical analysis on provinces and products with important VS activities in order to assess China's trade value-added. Exploring the vertical division of labour, and foreign direct investment (FDI) driving China's import and export imbalance, the book is divided into eight chapters, each covering an aspect of VS in China. The first chapter outlines the aims and method of the study. Chapter two covers VS trade pattern and trade surplus. Chapter three looks at FDI and the import and export imbalance, and chapter four covers the relationship between VS and import and export of foreign invested enterprises. The fifth chapter considers the causes and prospects for growth in China-US and China-Japan trade. Chapters six and seven give an empirical analysis of VS and trade surplus, and a breakdown of VS per industry in China's provinces. Finally, chapter eight considers rebalancing imports and

exports in China. Measures VS across China including the developed provinces based on the newest input-output table Presents the main provinces and products closely related to VS Gives evidence on global VS trade patterns from China's national data

How We Know What Isn't So Thomas Gilovich, 2008-06-30 Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life. When can we trust what we believe—that teams and players have winning streaks, that flattery works, or that the more people who agree, the more likely they are to be right—and when are such beliefs suspect? Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life. Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action.

**Foucault, Health and Medicine** Robin Bunton, Alan Petersen, 2002-01-08 The reception of Michel Foucault's work in the social sciences and humanities has been phenomenal. Foucault's concepts and methodology have encouraged new approaches to old problems and opened up new lines of enquiry. This book assesses the contribution of Foucault's work to research and thinking in the area of health and medicine, and shows how key researchers in the sociology of health and illness are currently engaging with his ideas. Foucault, Health and Medicine explores such important issues as: Foucault's concept of 'discourse', the critique of the 'medicalization' thesis, the analysis of the body and the self, Foucault's concept of 'bio-power' in the analysis of health education, the implications of Foucault's ideas for feminist research on embodiment and gendered subjectivities, the application of Foucault's notion of governmentality to the analysis of health policy, health promotion, and the consumption of health. Foucault, Health and Medicine offers a 'state of the art' overview of Foucauldian scholarship in the area of health and medicine. It will provide a key reference for both students and researchers working in the areas of medical sociology, health policy, health promotion and feminist studies.
