The Oxford Handbook of Comparative Cognition Thomas R. Zentall,Edward A. Wasserman,2012-03-20 In the past decade, the field of comparative cognition has grown and thrived. No less rigorous than purely behavioristic investigations, examinations of animal intelligence are useful for scientists and psychologists alike in their quest to understand the nature and mechanisms of intelligence. Extensive field research of various species has yielded exciting new areas of research, integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition. The Oxford Handbook of Comparative Cognition contains sections on perception and illusion, attention and search, memory processes, spatial cognition, conceptualization and categorization, problem solving and behavioral flexibility, and social cognition processes including findings in primate tool usage, pattern learning, and counting. The authors have incorporated findings and theoretical approaches that reflect the current state of the field. This comprehensive volume will be a must-read for students and scientists who want to know about the state of the art of the modern science of comparative cognition.

Oxford Handbook of Internet Psychology Adam Joinson,Katelyn McKenna,Tom Postmes,Ulf-Dietrich Reips,2009-02-12 Over one billion people use the Internet globally. Psychologists are beginning to understand what people do online, and the impact being online has on behaviour. It's making us re-think many of our existing assumptions about what it means to be a social being. For instance, if we can talk, flirt, meet people and fall in love online, this challenges many of psychology's theories that intimacy or understanding requires physical co-presence. The Oxford Handbook of Internet Psychology brings together many of the leading researchers in what can be termed 'Internet Psychology'. Though a very new area of research, it is growing at a phenomenal pace. In addition to well-studied areas of investigation, such as social identity theory, computer-mediated communication and virtual communities, the volume also includes chapters on topics as diverse as deception and misrepresentation, attitude change and persuasion online, Internet addiction, online relationships, privacy and trust, health and leisure use of the Internet, and the nature of interactivity. With over 30 chapters written by experts in the field, the range and depth of coverage is unequalled, and serves to define this emerging area of research. Uniquely, this content is supported by an entire section covering the use of the Internet as a research tool, including qualitative and quantitative methods, online survey design, personality testing, ethics, and technological and design issues. While it is likely to be a popular research resource to be 'dipped into', as a whole volume it is coherent and compelling enough to act as a single text book. The Oxford Handbook of Internet Psychology is the definitive text on this burgeoning field. It will be an essential resource for anyone interested in the psychological aspects of Internet use, or planning to conduct research using the 'net'.

The Problem-Centred Interview Andreas Witzel,Herwig Reiter,2012-06-22 This book provides the first English language account of the interview method known as the PCI. Offering a way of collecting knowledge by means of involving people actively in the research process, the interviewer takes the role of a well-informed traveller. With careful preparation and planning, the interviewer sets out with priorities and expectations, but the story the interviewer tells about his journey depends on the people encountered along the road. Novice and experienced interview researchers across the social, educational and health sciences will find this an invaluable guide to conducting interviews. Andreas Witzel is senior researcher (retired) at the University of Bremen and former director of the Bremen Archive for Life Course Research. Herwig Reiter is senior researcher in the Department of Social Monitoring and Methodology of the German Youth Institute in Munich.
