Fiscal Year 2008 U. S. Gov'T. Financial Statements: Federal Gov'T. Faces New and Continuing Financial Management and Fiscal Challenges Gene L. Dodaro,2010 The consolidated financial statements of the U.S. gov;t. (CFS) is audited each year. Except for the 2008 and 2007 Statements of Social Insurance, the auditor has been unable to provide assurance on the reliability of the CFS due primarily to inadequate systems and lack of sufficient, reliable evidence to support certain material information in the CFS. Unless these weaknesses are adequately addressed, they will, among other things: (1) hamper the fed. gov;t's. ability to reliably report a significant portion of its assets, liabilities, costs, and other related information; and (2) affect the fed. gov;t's. ability to measure the full cost as well as the financial and nonfinancial performance of certain programs and activities. Men Explain Things to Me Rebecca Solnit,2014-04-14 The National Book Critics Circle Award-winning author delivers a collection of essays that serve as the perfect "antidote to mansplaining" (The Stranger). In her comic, scathing essay "Men Explain Things to Me," Rebecca Solnit took on what often goes wrong in conversations between men and women. She wrote about men who wrongly assume they know things and wrongly assume women don't, about why this arises, and how this aspect of the gender wars works, airing some of her own hilariously awful encounters. She ends on a serious note— because the ultimate problem is the silencing of women who have something to say, including those saying things like, "He's trying to kill me!" This book features that now-classic essay with six perfect complements, including an examination of the great feminist writer Virginia Woolf's embrace of mystery, of not knowing, of doubt and ambiguity, a highly original inquiry into

marriage equality, and a terrifying survey of the scope of contemporary violence against women. "In this series of personal but unsentimental essays, Solnit gives succinct shorthand to a familiar female experience that before had gone unarticulated, perhaps even unrecognized." -The New York Times "Essential feminist reading." -The New Republic "This slim book hums with power and wit." -Boston Globe "Solnit tackles big themes of gender and power in these accessible essays. Honest and full of wit, this is an integral read that furthers the conversation on feminism and contemporary society." -San Francisco Chronicle "Essential." -Marketplace "Feminist, frequently funny, unflinchingly honest and often scathing in its conclusions." -Salon

Attosecond and XUV Physics Thomas Schultz,Marc Vrakking,2013-11-13 This book provides fundamental knowledge in the fields of attosecond science and free electron lasers, based on the insight that the further development of both disciplines can greatly benefit from mutual exposure and interaction between the two communities. With respect to the interaction of high intensity lasers with matter, it covers ultrafast lasers, high-harmonic generation, attosecond pulse generation and characterization. Other chapters review strong-field physics, free electron lasers and experimental instrumentation. Written in an easy accessible style, the book is aimed at graduate and postgraduate students so as to support the scientific training of early stage researchers in this emerging field. Special emphasis is placed on the practical approach of building experiments, allowing young researchers to develop a wide range of scientific skills in order to accelerate the development of spectroscopic techniques and their implementation in scientific experiments. The editors are managers of a research network devoted to the education of young scientists, and this book idea is based on a summer school organized by the ATTOFEL network.

Transforming Technologies to Manage Our Information William Jones,2013-10-01 With its theme, Our Information, Always and Forever, Part I of this book covers the basics of personal information management (PIM) including six essential activities of PIM and six (different) ways in which information can be personal to us. Part I then goes on to explore key issues that arise in the great migration of our information onto the Web and into a myriad of mobile devices. Part 2 provides a more focused look at technologies for managing information that promise to profoundly alter our practices of PIM and, through these practices, the way we lead our lives. Part 2 is in five chapters: - Chapter 5. Technologies of Input and Output. Technologies in support of gesture, touch, voice, and even eye movements combine to support a

more natural user interface (NUI). Technologies of output include glasses and watch watches. Output will also increasingly be animated with options to zoom. - Chapter 6. Technologies to Save Our Information. We can opt for life logs to record our experiences with increasing fidelity. What will we use these logs for? And what isn't recorded that should be? - Chapter 7. Technologies to Search Our Information. The potential for personalized search is enormous and mostly yet to be realized. Persistent searches, situated in our information landscape, will allow us to maintain a diversity of projects and areas of interest without a need to continually switch from one to another to handle incoming information. - Chapter 8. Technologies to Structure Our Information. Structure is key if we are to keep, find, and make effective use of our information. But how best to structure? And how best to share structured information between the applications we use, with other people, and also with ourselves over time? What lessons can we draw from the failures and successes in web-based efforts to share structure? - Chapter 9. PIM Transformed and Transforming: Stories from the Past, Present and Future. Part 2 concludes with a comparison between Licklider's world of information in 1957 and our own world of information today. And then we consider what the world of information is likely to look like in 2057. Licklider estimated that he spent 85% of his thinking time in activities that were clerical and mechanical and might (someday) be delegated to the computer. What percentage of our own time is spent with the clerical and mechanical? What about in 2057?
