Heroes and Saints Phyllis Granoff,Koichi Shinohara,2009-05-05 The present volume makes a unique contribution to the study of dying in ancient cultures by focusing on what happens in the critical moments before death. Employing a wide range of literary sources, the essays in this volume focus exclusively on the moment of death and practices associated with the transition from this world to the next. Five of the essays deal with Asian religions, primarily Buddhism in India, Tibet, China, and Japan. The other five essays deal with the moment of death in the West, old Norse-Icelandic, Old English, and the Judeo-Christian tradition. The authors explore the many ways in which the good death was envisioned. Remarkable parallels emerge between the good death in religious texts and in heroic sagas . Despite the diversity of cultures, time periods and religious traditions represented in these essays, this volume vividly illustrates the fundamental human need to see in the inevitable moment of death a possibility of choice and a promise of hope.

Republic of Poland International Monetary Fund,2010-05-14 The Selected Issues paper on Poland underlies that as the only European Union economy to avoid outright recession during the crisis, Poland is likely to attract renewed risk appetite. Poland could become one of the main recipients of capital inflows. This could lead to excessive exchange-rate appreciation, which would undermine competitiveness. The volatility of capital flows into Poland has been lower during both the boom and crisis periods, in part owing to timely introduction in the boom period of countercyclical macroprudential measures.
