Cashing Out Neill Lochery, 2023-11-07 When Nazis looked to flee Europe with stolen art, gems, and gold in tow, certain “neutral” countries were all too willing to assist them. By the end of January 1945, it was clear to Germany that the war was lost. The Third Reich was in freefall, and its leaders, apart from those clustered around Hitler in his Berlin bunker, sought to abscond before they were besieged. But they wanted to take their wealth with them. Their escape routes were diverse: Sweden and Switzerland boasted proximity, banking, and industrial closeness, while Spain and Portugal offered an inviting Atlantic coastline and shipping routes to South America. And in various ways, each of these so-called neutral nations welcomed the Nazi escapees, along with the clandestine wealth they carried. *Cashing Out* tells the riveting history of the race to intercept the stolen assets before they disappeared, and before the will to punish Germany was replaced by the political considerations of the fast-approaching Cold War. Bestselling author Neill Lochery here brilliantly recounts the flight of the Nazi-looted riches—the last great escape of World War II—and the Allied quest for justice.

Bombing Pompeii Nigel Pollard, 2020-11-18 *Bombing Pompeii* examines the circumstances under which over 160 Allied bombs hit the archaeological site of Pompeii in August and September 1943, and the wider significance of this event in the history of efforts to protect cultural heritage in conflict zones, a broader issue that is still of great importance. From detailed examinations of contemporary archival document, Nigel Pollard shows that the bomb damage to ancient Pompeii was accidental, and the bombs were aimed at road and rail routes close to the site in an urgent attempt to slow down the reinforcement and supply of German counter- attacks that threatened to defeat the Allied landings in the Gulf of Salerno. The book sets this event, along with other instances of damage and risk to cultural heritage in Italy in the Second World War, in the context of the development of the Allied Monuments, Fine Arts, and Archives – the “Monuments Men.”

United States Code United States, 2013 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred

Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.

The Right to a Healthy Environment David R.

Boyd,2012-10-03 Canada has abundant natural

wealth, beautiful landscapes, vast forests, and thousands of rivers and lakes. The land defines Canadians as a people, yet the country has one of the industrialized world's worst environmental records. Building on his previous book, *The Environmental Rights Revolution* (2012), David R. Boyd describes how recognizing the constitutional right to a healthy environment could have a transformative impact by empowering citizens, holding governments and industry accountable, and improving Canada's green record. This important and provocative book provides a road map to protect human health, the well-being of the planet, and the interests of future generations.

Hispanojewish Archaeology (2 vols.) Alexander Bar-Magen Numhauser, 2021-05-25 In *Hispanojewish Archaeology* Alexander Bar-Magen Numhauser describes the material culture of the Jewish communities in Hispania of the first millennium CE by studying their archaeological remains in the Iberian Peninsula and surrounding western Mediterranean regions.

Disputed Archival Heritage James Lowry, 2022-10-10 *Disputed Archival Heritage* brings important new perspectives into the discourse on displaced archives. In contrast to shared or joint heritage framings, the book considers the implications of force, violence and loss in the displacement of archival heritage. With chapters from established and emerging scholars in archival studies, *Disputed Archival Heritage* extends and enriches the conversation that started with the earlier volume, *Displaced Archives*. Advancing novel theories and methods for understanding

disputes and claims over archives, the volume includes chapters that focus on Indigenous records in settler colonial states; literary and community archives; sub-national and private sector displacements; successes in repatriating formerly displaced archives; comparisons with cultural objects seized by colonial powers and the relationship between repatriation and reparations. Analysing key concepts such as joint heritage and provenance, the contributors unsettle Western understandings of records, place and ownership. *Disputed Archival Heritage* speaks to the growing interest in shared archival heritage, repatriation of cultural artefacts and cultural diasporas. As such, it will be a useful resource for academics, students and practitioners working in the field of archives, records and information management, as well as cultural property and heritage management, peace and conflict studies and international law.

Quebec Women and Legislative Representation

Manon Tremblay, 2010-07-01 Women represent a slight majority of Quebec's population, yet they continue to occupy a minority of seats in its National Assembly and in Canada's House of Commons and Senate. To explain why this is, Manon Tremblay examines Quebec women's political engagements from 1791 to the present. She traces the path that led to women obtaining the rights to vote and run for office and then draws on statistics and interviews with female politicians to paint an in-depth portrait of women's under-representation and its main causes. Her innovative account not only documents the significant democratic deficit in Canada's parliamentary systems, it also outlines

strategies to improve women's access to legislative representation in Canada and elsewhere.

Development Vincenzo E.A. Russo, Stuart Brody, David Cove, Sergio Ottolenghi, 2012-12-06 As a result of the molecular genetic analysis of development similar mechanisms for the regulation of gene expression are found in a wide range of organisms. In Development - the Molecular Genetic Approach these common mechanisms as well as the specific events leading to a differentiated cell are described. Particular items treated are, for example, how asymmetry is achieved, how cell size is determined, how cell division is controlled, how cell lineage influences development, how cells know their position, and how cells communicate during development.

Aboriginal Conditions Jerry P. White, Paul S. Maxim, Dan Beavon, 2011-11-01 Aimed at three main constituencies - Aboriginal and non-Aboriginal social scientists, government and Aboriginal policymakers, and Aboriginal communities - the book has multiple purposes. First, it presents findings from recent research, with the goal of advancing research agenda, and stimulating positive social development. Second, it encourages greater links between the social scientific and external research communities and demonstrates the kind of research needed as a foundation for public policy. Finally, it acts as a guide to research methods for Aboriginal communities and organizations, and promotes cooperation between researchers and Aboriginal peoples in an effort to ensure that research decisions serve both groups

equally. A vital addition to public policy and Native studies, Aboriginal Conditions will be welcomed by social scientists, policymakers, and academics working in these fields.
