2312 Kim Stanley Robinson,2012-05-22 From the acclaimed author of *New York 2140* and *Red Mars*, this NYT bestselling novel tells the story of a future where humanity has populated miraculous new habitats engineered across the solar system--and the one death that triggers a precarious chain of events that could destroy it all. Winner of the Nebula Award for Best Science Fiction Novel The year is 2312. Scientific and technological advances have opened gateways to an extraordinary future. Earth is no longer humanity's only home; new habitats have been created throughout the solar system on moons, planets, and in between. But in this year, 2312, a sequence of events will force humanity to confront its past, its present, and its future. The first event takes place on Mercury, on the city of Terminator, itself a miracle of engineering on an unprecedented scale. It is an unexpected death, but one that might have been foreseen. For Swan Er Hong, it is an event that will change her life. Swan was once a woman who designed worlds. Now she will be led into a plot to destroy them.

n-Space Chris Martin,2011-04-29 Far in the future, the merchant ships of the Space Trading Commission fleet

travel the space lanes— each on journeys of trade and exploration. As the Phoenix “falls through a crack in the sky” after completing one of its many n-space jumps, First Officer Jana Maines makes an astounding discovery. Jana detects a derelict—a ghost ship from the forgotten past. Believing this to be an opportunity to advance her career and financially help her parents, Jana attempts to convince her captain that they should investigate, but he insists that they remain on course. Just as they are about to depart, however, a signal is received from the ship—and Jana’s adventures begin! A routine resupply run to a lonely desert world becomes complicated when more than one man expresses greater interest in her than her ship’s cargo. While on a mission from an ocean world, she desperately tries to find a way to save millions of fish eggs critical to the survival of an entire planet. Her encounters include an astonishingly ancient woman, a wealthy mystic, and a string of crusty, opinionated captains. In a series of science fiction stories that span the far reaches of the universe, a courageous captain-in-training faces challenges that test her abilities to the limit as she strives to complete her missions.
