Classic Period Mixtequilla, Veracruz, Mexico

Barbara L. Stark, 2001 This archaeological site report presents new insights on an important but poorly-studied Mesoamerican culture-the Classic period of the Mexican Gulf Coast. Stark discusses her excavations at several sites in the Mixtequilla region, describes the deposits and artifacts encountered, and provides interpretations of the sites and their significance within a wider context. Her analysis of the ephemeral remains of perishable houses is innovative and contains one of the most sophisticated treatments of site formation processes yet carried out in Latin America. Particularly important is the identification of some of the earliest spindle whorls in Mesoamerica, leading to new views of the importance of cotton textiles in the changing economies of the Late Preclassic and Classic periods. Superb artifact illustrations, detailed descriptions, and an ample use of data tables, make this a valuable reference work. Mesoamericanists will find much of interest in this book, as will readers interested in tropical lowland settlement patterns, household archaeology, and site formation processes.

Multiple Parton Interactions at the LHC Paolo Bartalini, Jonathan Richard Gaunt, 2018-11-08 Many high-energy collider experiments (including the current Large Hadron Collider at CERN) involve the collision of hadrons. Hadrons are composite particles consisting of partons (quarks and gluons), and this means that in any hadron-hadron collision there will typically be multiple collisions of the constituents – i.e. multiple parton interactions (MPI). Understanding the nature of the MPI is important in terms of searching for new physics in the products of the scatters, and also in its own right to gain a greater understanding of hadron structure. This book aims at providing a pedagogical introduction and a comprehensive review of different research lines linked by an involvement of MPI phenomena. It is written by pioneers as well as young leading scientists, and reviews both experimental findings and theoretical developments, discussing also the remaining open issues.
