Introduction to Algebraic Independence Theory Yuri V. Nesterenko,Patrice Philippon,2003-07-01 In the last five years there has been very significant progress in the development of transcendence theory. A new approach to the arithmetic properties of values of modular forms and theta-functions was found. The solution of the Mahler-Manin problem on values of modular function $j(\tau)$ and algebraic independence of numbers π and e^π are most impressive results of this breakthrough. The book presents these and other results on algebraic independence of numbers and further, a detailed exposition of methods created in last the 25 years, during which commutative algebra and algebraic geometry exerted strong catalytic influence on the development of the subject.
