Metallurgy John Percy,1875

Metallurgy: the art of extracting metals from their ores. Introduction, refractory materials, and fuel John Percy (M.D.),1875

TEXTBOOK OF MATERIALS AND METALLURGICAL THERMODYNAMICS AHINDRA GHOSH,2002-01-01 Metallurgical Thermodynamics, as well as its modified version, Thermodynamics of Materials, forms a core course in metallurgical and materials engineering, constituting one of the principal foundations in these disciplines. Designed as an undergraduate textbook, this concise and systematically organized text deals primarily with the thermodynamics of systems involving physico-chemical processes and chemical reactions, such as calculations of enthalpy, entropy and free energy changes of processes; thermodynamic properties of solutions; chemical and phase equilibria; and thermodynamics of surfaces, interfaces and defects. The major emphasis is on high-temperature systems and processes involving metals and inorganic compounds. The many worked examples, diagrams, and tables that illustrate the concepts discussed, and chapter-end problems that stimulate self-study should enable the students to study the subject with enhanced interest.

Archaeological Investigations in a Northern Albanian Province: Results of the Projekti Arkeologjik I Shkodrës (PASH) Michael L. Galaty,Lorenc Bejko,2023-09-12 To date, very few northern Albanian archaeological sites have been surveyed and excavated. Situated beyond the reach, and allure, of the Classical Greek colonies of south-central Albania, the region has drawn less scholarly attention. But in various ways, northern Albania is just as important to the ongoing archaeological debates regarding the origins of inequality and the rise of social complexity. Some of the earliest and largest hill forts and tumuli (burial mounds) in Albania, dating to the Bronze and Iron Age, are located in Shkodër. Shkodër (Rozafa) Castle became the capital of the so-called Illyrian Kingdom, which was conquered by Rome in the early 3rd century BC. This research report, focused on the province of

Shkodër, is based on five years of field and laboratory work and is the first synthetic archaeological treatment of this region. The results of the Projekti Arkeologjik i Shkodrës (or PASH) are presented here in two volumes. Volume 1 includes geological context, a literature review, historical background, and reports on the regional survey and test excavations at three settlements and three tumuli. In Volume 2, the authors describe the artifacts recovered through survey and excavation, including chipped stone, small finds, and pottery from the prehistoric, Classical, Roman, medieval, and post-medieval periods. They also present results of faunal, petrographic, chemical, carpological, and strontium isotope analyses of the artifacts. Extensive supporting data is available on the University of Michigan's Deep Blue data repository: <https://doi.org/10.7302/xnpy-0e60> These two volumes place northern Albania--and the Shkodër Province in particular--at the forefront of archaeological research in the Balkans.
