GB/T-2022, GB-2022 -- Chinese National Standard PDF-English, Catalog (year 2022)

<https://www.chinesestandard.net>,2022-06-02 This document provides the comprehensive list of Chinese National Standards - Category: GB, GB/T Series of year 2022.

*Handbook of Development Economics* Hollis Burnley  
Chenery,T. Paul Schultz,T. N. Srinivasan,John Strauss,Jere R. Behrman,1988 This handbook organizes chapters by sets of policies that are important components of discussions about how to facilitate development. In each chapter, authors identify and discuss the relevant theoretical and empirical literature that describes the fundamental problems that the policies seek to remedy or ameliorate, as well as the literature that evaluates the effects of the policies. It presents an accurate, self-contained survey of the current state of the field. It summarizes the most recent discussions, and elucidates new developments. Although original material is also included, the main aim is the provision of comprehensive and accessible surveys

Advanced EPR A.J. Hoff,2012-12-02 This new book provides an up-to-date survey of existing EPR techniques and their

applications in biology and biochemistry, and also provides a wealth of ideas for future developments in instrumentation and theory. The material is broadly organized into four parts. In the first part (chapters 1 to 6) pulsed EPR is discussed in detail. The second part (chapters 7 to 12) provides detailed discussions of a number of novel and experimental methods. The third part comprises seven chapters on double-resonance techniques, five on ENDOR and two on optically- and reaction yield-detected resonance. The final part is devoted to a thorough discussion of a number of new developments in the application of EPR to various biological and biochemical problems. Advanced EPR will interest biophysicists, physical biochemists, EPR spectroscopists and others who will value the extensive treatment of pulsed EPR techniques, the discussion of new developments in EPR instrumentation, and the integration of theory and experimental details as applied to problems in biology and biochemistry.
