## **Satellite and Terrestrial Hybrid Networks** Pascal

Berthou, Cédric Baudoin, Thierry Gayraud, Matthieu

Gineste, 2015-08-26 This book offers the reader the keys for a

successful understanding, integration and usage of satellite systems in addition to next generation terrestrial networks. The

DVB-S2/RCSSystem is used to illustrate the integration

challenges. The presentation uses a system approach, i.e. it

tackles the terrestrial and satellite telecommunication

systems' complexity with a high level approach, focusing on the systems' components and on their interactions.

Several scenarios present the different paths that can be followed for the integration of satellite systems in terrestrial networks.

Quality of Service management techniques in terrestrial and satellite systems and the solutions to help them to interoperate

are provided. Inter-system mobility solutions and performance

problems are then addressed. The solutions proposed in this book have been developed within the framework of European and

French funded research projects and tested with simulated or real testbeds.
