*Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies* Vyacheslav V. Komarov,2012 The application of microwave energy for thermal processing of different materials and substances is a rapidly growing trend in modern science and engineering. In fact, optimal design work involving microwaves is impossible without solid knowledge of the properties of these materials. Heres a practical reference that collects essential data on the dielectric and thermal properties of microwaveable materials, saving you countless hours on projects in a wide range of areas, including microwave design and heating, applied electrodynamics, food science, and medical technology. This unique book provides hard-to-find information on complex dielectric permittivity of media at industrial, scientific, and medical frequencies (430 MHz, 915MHz, 2.45GHz, 5.8 GHz, and 24.125GHz). Written by a leading expert in the field, this authoritative book does an exceptional job at presenting critical data on various materials and explaining what their key characteristics are concerning microwaves.

Serengeti II A. R. E. Sinclair,Peter Arcese,1995-08 Serengeti II: Dynamics, Management, and Conservation of an Ecosystem brings together twenty years of research by leading scientists to provide the most most thorough understanding to date of the spectacular Serengeti-Mara ecosystem in East Africa, home to one of the largest and most diverse populations of animals in the world. Building on the groundwork laid by the classic Serengeti: Dynamics of an Ecosystem, published in 1979 by the University of Chicago Press, this new book integrates studies of the ecosystem at every level—from the plants at the bottom of the visible food chain, to the many species of herbivores and predators, to the system as a whole. Drawing on new data from many long-term studies and from more recent research initiatives, and applying new theory and computer technology, the contributors examine the large-scale processes that have produced the Serengeti's extraordinary biological diversity, as well as the interactions among species and between plants and animals and their environment. They also introduce computer modeling as a tool for exploring these interactions, employing this new technology to test and anticipate the effects of social, political, and economic changes on the entire ecosystem and on particular species, and so to shape future conservation and management strategies.

*Bulb Book* John Weathers,2009-02 John Weathers's 1911 work is detailed discussion of bulbous plants from all over the world.

<https://www.chinesestandard.net>,2024-04-03 This document stipulates the maximum residue limits for 290 items of 112 pesticides including 2,4-sodium butyrate in food. This document applies to foods related to limits. The food categories and measurement locations (Appendix A), which are specified in GB 2763-2021, are applicable to this document. If the maximum residue limit of a certain pesticide is applied to a certain food category, it will apply to all foods under that food category, unless otherwise there are special provisions. If the limit values for the same pesticide and food specified in GB 2763-2021 are different from this document, this document shall prevail.
