Air Warriors Douglas Waller,2019-06-04 Veteran journalist and author of *The Commandos* Douglas Waller chronicles his rare and intimate experience with the training program for Navy pilots in this “engrossing saga that will likely become an unofficial recruiting tool for naval aviation” (Publishers Weekly). Waller, who was granted permission to participate in the pilots’ grueling training regime, has written an absorbing behind-the-scenes account of the physical and psychological trials endured by the most specialized group of pilots in military history. From his bird’s-eye view in the passenger’s seat, Waller follows pilot trainees through two years of intense preparation. He offers vivid illustrations from the fray: hair-raising aerial dogfights; stomach-swallowing dive-bombing runs; high-speed tactical maneuvers grazing the desert floor; and numerous nerve-twisting aircraft carrier takeoffs and landings. In addition to his own experiences and those of the group of trainees he joins, his research is based on interviews with hundreds of other students and their instructors. Hurtling through the air at death-defying speeds, these pilots-in-training struggle to maintain their composure while withstanding conditions that are designed to challenge them to the very limits of human endurance. Waller’s deftly drawn portraits of the men and women he encounters in this singular culture of elite pilots are as satisfying as his adventure narrative. The pilots, whose grit, determination, and mental agility operate on an elevated threshold, come into sharp focus behind Waller’s keen lens: their aspirations, awe inspiring. *Air Warriors* combines an examination of the modern Navy, recovering from past sex scandals, with a portrayal of a privileged cadre of men and women whose ambition and commitment coexist within a tightly knit group. Waller is able to capture images of these pilots training, living, and fighting with an acuity and intelligence that are often absent from Hollywood and television treatments of this diverse and fascinating subculture. *Air Warriors* takes us inside the cockpit and behind closed doors for the real story of the making of a Navy pilot.

Yawed-Rolling Tire Mechanical Properties Testing of the Navy T-45 Aircraft Tires National Aeronautics and Space Administration (NASA),2018-06-27 The T-45 Goshawk is a United States Navy Jet aircraft used primarily as a trainer. The aircraft design makes use of off the shelf hardware as much as possible and was found to have unusual directional control issues during around operations. The aircraft was involved in numerous pilot-induced-oscillation incidents as well as observed to have unusual directional control reactions to failed main gear tires, a condition that is normally handled relatively easily by conventional aircraft steering control techniques. The behavior of the aircraft's tires had previously been modeled in simulators as a result of approximations provided in 40-year-old reference publications. Since knowledge of the true tire cornering and braking behavior is essential to modeling, understanding, and fixing directional control problems, the United States Navy requested assistance from the NASA Langley Research Center's (LARC) Aircraft Landing Dynamics Facility (ALDF) to define the yawed-rolling mechanical properties of the T-45 aircraft tires. The purpose of this report is to document the results of testing the subject tires at the NASA LaRC ALDF in September 1998. Brief descriptions of the Instrumented Tire Test Vehicle (ITTV) are included to familiarize the reader with the ITTV capabilities, data acquisition system, test and measurement techniques, data accuracy, and analysis and presentation of the testing results.
