Handbook on Synchrotron Radiation G.V. Marr,2013-10-22 Volume 2 of this series concentrates on the use of synchrotron radiation which covers that region of the electromagnetic spectrum which extends from about 10eV to 3keV in photon energy and is essentially the region where the radiation is strongly absorbed by atmospheric gases. It therefore has to make extensive use of a high vacuum to transport the radiation to the workstation where the presence of hard X-rays can cause extensive damage to both the optics and the targets used in the experimental rigs. The topics chosen for this volume have been limited to the disciplines of physics and chemistry.

War and Conflict Quotations Michael C. Thomsett,Jean Freestone Thomsett,2015-09-02 History is replete with pronouncements on war. Some reflect on man’s warlike nature (“We are quick to flare up, we races of men on the earth”—Homer); others deal with the practical strategies of the combatants (“If Hitler invaded hell I would make at least a favorable reference to the devil in the House of Commons”—Winston Churchill); and still others offer advice for avoiding conflict (“The most disadvantageous peace is better than the most just war”—Desiderius Erasmus). More than 2,700 quotations on war and conflict are presented in this reference work. The quotations are arranged by more than 100 broad categories, from action to winning. For each, the quotation is first given, followed by its author, the work in which it appeared (when appropriate), and the date. The book includes numerous cross-references, and keyword-in-context and author indexes are provided for further utility.
