Gas Turbines Bijay Sultanian,2018-07-31 This long-awaited, physics-first and design-oriented text describes and explains the underlying flow and heat transfer theory of secondary air systems. An applications-oriented focus throughout the book provides the reader with robust solution techniques, state-of-the-art three-dimensional computational fluid dynamics (CFD) methodologies, and examples of compressible flow network modeling. It clearly explains elusive concepts of windage, non-isentropic generalized vortex, Ekman boundary layer, rotor disk pumping, and centrifugally-driven buoyant convection associated with gas turbine secondary flow systems featuring rotation. The book employs physics-based, design-oriented methodology to compute windage and swirl distributions in a complex rotor cavity formed by surfaces with arbitrary rotation, counter-rotation, and no rotation. This text will be a valuable tool for aircraft engine and industrial gas turbine design engineers as well as graduate students enrolled in advanced special topics courses.

The Small Window Linda Teigland Clark,2008-06-15 The Thorald homestead was located near the banks of St. Peters River in the southern portion of Wisconsin Territory. One day this region would become part of the great state of Minnesota; the river would be renamed the Minnesota River; and near the old homestead, a city would rise and identify itself after Chief Mankato of the Mdewakanton Sioux. Pa and the twins worked hard to turn that rich black earth into life and subsistence for his wife and five younguns. When the unpredictable weather fought his labor and sweat and the land turned against him, survival rose to new heights. And Pa caught the dream of the new land It was 1848. Pa followed his dream; he was taking his family to the Promised Land, a land called California Pa taught his family that God will not shut a door without opening a window. He said it was Gods Way of leading His Children. And during these hard times, Pa added that it was the North wind that made the Vikings. What he didnt tell Laurin, his 17 year-old-daughter, was how small and difficult getting through that window might be or how long and strong that North wind might blow Laurin, like her father, dreamed big ...until tragedy struck! When cholera claimed the lives of her parents and older brothers in the Humboldt Sink, she had to find that window set her own sail against that staunch wind Only she remained to do it! She had to find a way not just to survive the trek over the Sierra and into California, but to survive and be safe, once they arrived in this untamed land dominated by men, gold, and greed. It wasnt for herself but for her younger brother, age 7, and sister, age 4. They were her responsibility their future; their very lives depended upon her. They couldnt go back; there was no back! She loved them she had to find a way Join Laurin as she transforms into Hardluck Lin and becomes a part of the early history of the California Gold Rush.
