- ⌚ **THE NANO-MICRO INTERFACE** HANS-JÜRGEN FECHT, MATTHIAS WERNER, 2006-03-06 Two exciting worlds of science and technology - the nano and micro dimensions. The former is a booming new field of research, the latter the established size range for electronics, and for mutual technological benefit and future commercialization, suitable junctions need to be found. Functional nanostructures such as DNA computers, sensors, neural interfaces, nanooptics or molecular electronics need to be wired to their 'bigger' surroundings. Coming from the opposite direction, microelectronics have experienced an unprecedented miniaturization drive in the last decade, pushing ever further down through the micro size scale towards submicron circuitry. Bringing these two worlds together is a new interdisciplinary challenge for scientists and engineers alike - recognized and substantially funded by the European Commission and other major project initiators worldwide. This book offers a wide range of information from technologies to materials and devices as well as from research to administrative know-how collected by the editors from renowned key members of the nano/micro community.

- ⌚ **WARS OF MODERN BABYLON** PESACH MALOVANY, 2017-07-21 As long as there have been wars, victors have written the prevailing histories of the world's conflicts. An army that loses -- and especially one that is destroyed or disbanded -- is often forgotten. Nevertheless, the experiences of defeated forces can provide important insights, lessons, and perspectives not always apparent to the winning side. In *Wars of Modern Babylon*, Pesach Malovany provides a comprehensive and detailed history of the Iraqi military from its formation in 1921 to its collapse in 2003. Malovany analyzes Iraqi participation in the 1948, 1967, and 1973 Arab wars against Israel as well as Iraq's wars with the Kurds during the twentieth century. His primary focus, however, is the era of Saddam Hussein (1979--2003), who implemented rapid and significant military growth and fought three major wars: against Iran from 1980 to 1988, and against coalition forces led by the United States in 1991 and 2003. He examines the Iraqi military at the strategic, operative, and tactical levels; explains its forces and branches; and investigates its use of both conventional and unconventional weapons. The first study to offer a portrait of an Arab army from its own point of view, *Wars of Modern Babylon* features interviews with and personal accounts from officers at various levels, as well as press accounts covering the politics and conflicts of the period. Malovany also analyzes books written by key figures in the Iraqi government and the army high command. His definitive chronicle offers English speakers new and overlooked perspectives on critical developments in twentieth-century history. The book won the Israel Yitzhak Sade Award for Military Literature in 2010.
