Harmonising EU Competition Litigation Maria Bergström,Marios Iacovides,Magnus Strand,2016-01-14 This volume in the Swedish Studies in European Law series, produced by the Swedish Network for European Legal Studies, heralds the new harmonised regime of private enforcement of EU competition law. In 2013, the Commission issued a Communication and Practical Guide to the quantification of harm in antitrust litigation and a Recommendation on collective redress. In 2014, the long-awaited Directive on actions for damages for infringements of EU competition law was finally adopted. In 2016, the Commission is expected to issue guidelines on the passing-on of overcharges. This book examines these recent developments and offers the perspectives of judges, officials, practitioners and academics. With a preface by Judge Carl Wetter of the General Court, the book explores five different themes. In section one, the main policy issues and challenges are presented. In section two, the new regime is placed in the bigger picture of recent EU law developments. In section three, the nexus between private enforcement and transparency is investigated. A comparative perspective is offered in section four by looking into private enforcement in five Member State jurisdictions. Finally, issues relating to causation, harm and indirect purchasers are explored in section five.

*Tables of IGC Cosmic Ray Data* J. A. Simpson,2013-10-22 Annals of the International Geophysical Year, Volume 28: Tables of IGC Cosmic Ray Data, Part III contains tabulations of International Geophysical Cooperation's cosmic ray activity data. This book includes lists of stations and investigators from whom further information on the cosmic ray apparatus can be obtained. In order to prepare the data on the following pages for publication, the data are first put on punched cards and then checked for correctness essentially by repunching, thus minimizing errors of transcription and also facilitate some computations which have been made with some of the data. Tabulating machines are then used to print the data on standard forms and the data are photographed for reproduction. As a further insurance against errors, carbon copies of the data sheets are sent to all investigators to be checked. The data marked as verified in the table of contents have been returned to the data center and the corrections made. This book will prove useful to geophysical researchers.

*Radar Systems Analysis and Design Using MATLAB* Bassem R. Mahafza,2015-09-15 Developed from the author's graduate-level courses, the first edition of this book filled the need for a comprehensive, self-contained, and hands-on treatment of radar systems analysis and design. It quickly became a bestseller and was widely adopted by many professors. The second edition built on this successful format by rearranging and updating topics and code. Reorganized, expanded, and updated, Radar Systems Analysis and Design Using MATLAB®, Third Edition continues to help graduate students and engineers understand the many issues involved in radar systems design and analysis. Each chapter includes the mathematical and analytical coverage necessary for obtaining a solid understanding of radar theory. Additionally, MATLAB functions/programs in each chapter further enhance comprehension of the theory and provide a source for establishing radar system design requirements. Incorporating feedback from professors and practicing engineers, the third edition of this bestselling text reflects the state of the art in the field and restructures the material to be more convenient for course use. It includes several new topics and many new end-of-chapter problems. This edition also takes advantage of the new features in the latest version of MATLAB. Updated MATLAB code is available for download on the book's CRC Press web page.

**Biomass Assessment** Andrew Millington,John Townsend,2013-11-05 Energy is an issue for everyone and nowhere more so than in the SADCC countries. But for sensible policy and planning, clear information about the extent of resources is needed. This innovative study combines the results of field assessment of biomass with advanced techniques in remote sensing by satellite to give the first comprehensive and detailed picture of biomass distribution throughout the SADCC region. The authors describe their techniques, classify the kinds of biomass and give its distribution, by that classification, in all nine SADCC countries. Woody biomass resources and supplies are clearly analysed. This book is essential reading for project officers, planners and all others involved in the collection and analysis of data on biomass resources throughout the world. Originally published in 1988

**Solar and Stellar Granulation** R. J. Rutten,Giuseppe Severino,2012-12-06 Robert J. Rutten Sterrekundig Instituut Utrecht, The Netherlands Why this workshop? Why this workshop? Or rather, since the real question that arose about a year ago was not whether there should be another OAC workshop, but only what it should be about: why a workshop on granulation? To answer this question I will play an unfair trick on you. I will simply present the scientific justification which I included last autumn in a grant application to NATO's Scientific Affairs Division. It lists the reasons why I thought a workshop on this particular topic and at this particular moment ought to be worthwhile. There must be something in its reasoning, because NATO has indeed agreed to co-sponsor this workshop, and because all of you have decided to spend time and effort on your contributions and to journey to this beautiful island in order to participate. But since the proof is in the pudding, I am eager to see whether indeed this workshop will be as outstanding as I have promised; in the meantime, you are entitled to know what we got you here for. The justification went as follows: The subject 'granulation' has recently become a hot topic, at the center of much new research, observational as well as

interpretational and theoretical, and both in solar physics and in stellar physics.
