Norton took his wife and his memories of her away. Now King wants them back. Kingston West put his military service behind him much easier than most of the soldiers he served with during the final world war. As far as he's concerned, the cyborg named Kingston 691 no longer exists. And the Cyber Husband program? He views that part of his past like he views having been a prisoner of war. Both are just service-related memories he doesn't plan on recalling ever again. His cybernetic restoration gave him a much better future. That's all King needs. At least he felt that way until he discovered one wife's file had been totally erased from his Cyber Husband records. Only her name remains in his data storage even though her family swears they'd had a loving relationship. How can he even begin to believe such a thing? King refuses to care about any of the women who bought him over the years. However, to put his mysterious past completely behind him, he needs to find the missing Seetha Harrington and hear her side of their story. Before he can enjoy his new beginning, King needs to find out why Norton took away those seven years they had together from both of them. ABOUT THIS SERIES - Set in the future, this science fiction action and adventure series explores military boundaries in a tale of created cyborgs and genetic engineering. It contains strong romance elements for paranormal, science fiction, and urban fantasy romance fans.
