**Andersonville diary** J.L. Ransom,2014 One of the most starkly vivid and detailed accounts of survival in Georgia's notorious Andersonville prison during the American Civil War. John Ransom was only 20 years old at the time of his capture. He kept a nearly daily diary during his year of misery at the Confederate prison. He and his fellow Union prisoners endured lice, starvation, freezing cold, killing heat, theft from other inmates...and Captain Wirtz. Capt. Wirtz very domineering and abusive. Is afraid to come into camp any more. There are a thousand men in here who would willingly die if they could kill him first. Death was a daily occurrence. Yet Ransom knew if he gave up hope, he would die. He somehow kept his humor and kept on writing. Through two escapes, time in a Rebel hospital, and eventual freedom, you'll read a POW account like none you've ever read before.

**The Economy of a Norse Settlement in the Outer Hebrides** Niall Sharples,2020-11-23 This book explores the economic evidence for the settlement at Bornais on South Uist. It reports in detail

on the large assemblages of material found during the excavations at mounds 2 and 2A. There is important evidence for craft activity, such as bone and antler working and this includes the only comb making workshop from a rural settlement in Britain. A large proportion of the copper alloy, bone and antler assemblages comprise pieces of personal adornment and provide important information on the dress and thereby social relations within the settlement occupation. There is a large assemblage of iron tools and fittings, which provides important information on the activities taking place at the settlement. The information derived from the artefact assemblages is complemented by that provided by the ecofactual material. Large amounts of animal, fish and bird bones plus carbonised plant remains provide detailed information on agricultural practices, and the processing, preparation and consumption of foodstuffs. It is clear that the Norse inhabitants of the settlement had access to a much richer variety of resources than had been exploited before the Viking colonisation of the region. The settlement also had a significantly wider range of connections; material culture indicates contacts to the south with the Irish Sea ports and Bristol, and to the north with Shetland and the Viking homelands of Norway. The evidence produced by these excavations is exceptional and provides an unparalleled opportunity to explore medieval life in the Scandinavian kingdoms of Western Britain.

**Similarity and Modeling in Science and Engineering** Josef Kuneš, 2012-04-07 The present text sets itself in relief to other titles on the subject in that it addresses the means and methodologies versus a narrow specific-task oriented approach. Concepts and their developments which evolved to meet the changing needs of applications are addressed. This approach provides the reader with a general tool-box to apply to their specific needs. Two important tools are presented: dimensional analysis and the similarity analysis methods. The fundamental point of view, enabling

one to sort all models, is that of information flux between a model and an original expressed by the similarity and abstraction Each chapter includes original examples and applications. In this respect, the models can be divided into several groups. The following models are dealt with separately by chapter; mathematical and physical models, physical analogues, deterministic, stochastic, and cybernetic computer models. The mathematical models are divided into asymptotic and phenomenological models. The phenomenological models, which can also be called experimental, are usually the result of an experiment on a complex object or process. The variable dimensionless quantities contain information about the real state of boundary conditions, parameter (non-linearity) changes, and other factors. With satisfactory measurement accuracy and experimental strategy, such models are highly credible and can be used, for example in control systems.
