GB/T 7141-2008 Translated English of Chinese Standard (GBT7141-2008) <https://www.chinesestandard.net>,2021-09-03 This Standard specifies the exposure conditions when plastics are only exposed to hot air at different temperatures for a long time. This Standard only specifies the method of heat exposure, but does not specify the test method or specimen. The influence of heat on any properties of plastics can be determined by selecting suitable test methods and specimens. This Standard recommends the use of ASTM D3826 standard to determine the end point of embrittlement. The end point of embrittlement means that at an initial strain rate of 0.1 mm/min, when 75% of the tested specimens have an elongation at break of 5% or less, the material reaches its end point of embrittlement.

The Average Consumer in Confusion-based Disputes in European Trademark Law and Similar Fictions Rasmus Dalgaard Laustsen,2019-11-06 This book contends that, with regard to the likelihood of confusion standard, European trademark law applies the average consumer incoherently and inconsistently. To test this proposal, it presents an analysis of the horizontal and vertical level of harmonization of the average consumer. The horizontal part focuses on similar fictions in areas of law adjacent to European trademark law (and in economics), and the average consumer in unfair competition law. The vertical part focuses on European trademark law, represented mainly by EU trademark law, and the trademark laws of the UK, Sweden, Denmark and Norway. The book provides readers with a better understanding of key aspects of European trademark law (the average consumer applied as part of the likelihood of confusion standard) and combines relevant law and practices with theoretical content and other related areas of law (and economics). Accordingly, it is an asset for policymakers and practitioners, as well as general readers with an interest in intellectual property law and theory.
