Nonlinear Differential Equations in Physics Santanu Saha Ray,2019-12-28 This book discusses various novel analytical and numerical methods for solving partial and fractional differential equations.

Moreover, it presents selected numerical methods for solving stochastic point kinetic equations in nuclear reactor dynamics by using Euler–Maruyama and strong-order Taylor numerical methods. The book also shows how to arrive at new, exact solutions to various fractional differential equations, such as the time-fractional Burgers–Hopf equation, the $(3+1)$ -dimensional time-fractional Khokhlov–Zabolotskaya–Kuznetsov equation, $(3+1)$ -dimensional time-fractional KdV–Khokhlov–Zabolotskaya–Kuznetsov equation, fractional $(2+1)$ -dimensional Davey–Stewartson equation, and integrable Davey–Stewartson-type equation. Many of the methods discussed are analytical–numerical, namely the modified decomposition method, a new two-step Adomian decomposition method, new approach to the Adomian decomposition method, modified homotopy analysis method with Fourier transform, modified fractional reduced differential transform method (MFRDTM), coupled fractional reduced differential transform method (CFRDTM), optimal homotopy asymptotic method, first integral method, and a solution procedure based on Haar wavelets and the operational matrices with function approximation. The book proposes for the first time a generalized

order operational matrix of Haar wavelets, as well as new techniques (MFRDTM and CFRDTM) for solving fractional differential equations. Numerical methods used to solve stochastic point kinetic equations, like the Wiener process, Euler–Maruyama, and order 1.5 strong Taylor methods, are also discussed.

Ebb and Flow Roy V Martin, 2020-03-01 During the Second World War the British Merchant Navy's main task was to bring food, fuel and materials to Britain and its allies, and to ferry troops wherever they were needed. The ship's crews came from all parts of the then Empire and beyond. One in six of them lost their lives. They did much more, taking part in the evacuations and landings throughout the war. They played a key role in several of these operations, particularly the little known evacuations from France after Dunkirk and the evacuation of Singapore. They manned almost a thousand ships for the D-Day Landings, including more than half of the infantry Landing ships and all of the Hospital Carriers that ferried the wounded back to Britain.
