Engineering Reliability and Risk in Water Resources L. Duckstein,Erich J. Plate,2012-12-06 Hydraulic, hydrologic and water resources engineers have been concerned for a long time about failure phenomena. One of the major concerns is the definition of a failure event E, of its probability of occurrence P(E), and of the complementary notion of reliability. However, as the stochastic aspects of hydraulics and water resources engineering were developed, words such as failure, reliability, and risk took on different meanings for different specialists. For example, risk is defined in a Bayesian framework as the expected loss resulting from a precisely defined failure event, while according to the practice of stochastic hydraulics it is the probability of occurrence of a failure event. The need to standardize the various concepts and operational definitions generated numerous exciting discussions between the co-editors of this book during 1983-84 when L. Duckstein, under sponsorship of the Alexander von Humboldt Foundation (FRG), was working with E. Plate at the Institute of Hydrology and Water Resources of the University of Karlsruhe. After consulting with the Scientific Affairs Division of NATO, an organizing committee was formed. This committee - J. Bernier (France), M. Benedini (Italy), S. Sorooshian (U. S. A.), and co-directors L. Duckstein (U. S. A.) and E. J. Plate (F. R. G.) -- brought into being this NATO Advanced Study Institute (ASI). Precisely stated, the purpose of this ASI was to present a tutorial overview of existing work in the broad area of reliability while also pointing out topics for further development.

Homicide, Gender and Responsibility Kate Fitz-Gibbon,Sandra Walklate,2016-03-22 The crime of homicide has long animated academic debate, community concern and political attention. The discussion has often centered on the perceived (in)adequacy of legal responses to homicide, questions of culpability, and divergent representations of victims and offenders. Within this, notions of gender, responsibility and justice are pivotal. This edited collection builds on existing scholarship by examining these concerns not only in the context of the ‘private’ world of domestic murder but also in the more ‘public’ world of the state, the corporation, war, and genocide. In so doing this book draws

from key frameworks of criminological thought, legal analysis and empirical evidence to critically examine the relationship between homicide, gender and responsibility. Bringing together leading international criminology and legal scholars, this collection provides a unique contribution to the academic and policy engagement with what is, more often than not, an ordinary and mundane crime. Analysing the crime in a variety of different social contexts alongside an in-depth and critical analysis of the interconnections between the ordinary act of lethal violence, gender and notions of responsibility, this book will be of interest to students, scholars and policymakers working in criminology and socio-legal studies.
