The Quantum Mechanics Conundrum Gennaro

Auletta,2019-08-17 This comprehensive volume gives a balanced and systematic treatment of both the interpretation and the mathematical-conceptual foundations of quantum mechanics. It is written in a pedagogical style and addresses many thorny problems of fundamental physics. The first aspect concerns Interpretation. The author raises the central problems: formalism, measurement, non-locality, and causality. The main positions on these subjects are presented and critically analysed. The aim is to show that the main schools can converge on a core interpretation. The second aspect concerns Foundations. Here it is shown that the whole theory can be grounded on information theory. The distinction between information and signal leads us to integrating quantum mechanics and relativity. Category theory is presented and its significance for quantum information shown; the logic and epistemological bases of the theory are assessed. Of relevance to all physicists and philosophers with an interest in quantum theory and its foundations, this book is destined to become a classic work.

Homicide, Gender and Responsibility Kate Fitz-Gibbon,Sandra  
Walklate,2016-03-22 The crime of homicide has long animated  
academic debate, community concern and political attention. The  
discussion has often centered on the perceived (in)adequacy of  
legal responses to homicide, questions of culpability, and divergent  
representations of victims and offenders. Within this, notions of  
gender, responsibility and justice are pivotal. This edited collection  
builds on existing scholarship by examining these concerns not  
only in the context of the ‘private’ world of domestic murder but

also in the more ‘public’ world of the state, the corporation, war, and genocide. In so doing this book draws from key frameworks of criminological thought, legal analysis and empirical evidence to critically examine the relationship between homicide, gender and responsibility. Bringing together leading international criminology and legal scholars, this collection provides a unique contribution to the academic and policy engagement with what is, more often than not, an ordinary and mundane crime. Analysing the crime in a variety of different social contexts alongside an in-depth and critical analysis of the interconnections between the ordinary act of lethal violence, gender and notions of responsibility, this book will be of interest to students, scholars and policymakers working in criminology and socio-legal studies.
