A Growing Nation Robert A. Miles,2013-08-08 This book, that has been 22 years in the making, is the first printing of the R.A. Miles Collection of the Southwest History from 1831 to 1889. It's in chronological order by events and dates, and is a true and revealing account of the American history of the Southwest. It is an impartial, sometimes disconcerting, portrayal of the expanding United States westward. History is not always pleasant, but that is how it transpired sometimes in those years, and this book recounts both favorable and adverse events that need to be told. This country was expanding! It was growing; there were many heroes, many battles and many tragedies in the expansion of this country. It was like a glass of water sitting in the frigid cold. It froze and began to expand, the expansion could not be stopped, soon the glass burst. The final results were predictable and inevitable. The expansion couldn't go east because of an ocean, it could only go west to the other ocean, and that it did. This collection is about the events that transpired during the mid to late 1800's as a direct result of that westward growth. I have traveled these mountains for 7 of the 22 years in researching this book, from El Paso, Texas through Silver City, Lordsburg, Las Cruces and Stein, New Mexico and into Apache Pass in Arizona. I've explored Carlisle Canyon and drank the water at Goat Camp spring in Goat; journeyed through Camp Canyon, Hells Canyon, Steeple Rock Canyon, Red Rock, Crookson Peak and more. I have followed the trails of the old Butterfield Stage Line and found an old stage way station. I have found and taken pictures of over 150 old gold and silver mines and listed their histories, and listened to stories from an old miner as old as I am. What is most important, is I enjoyed every minute of it... Robert A. Miles

Coronary Angiography Baskot Branislav,2011-09-15 In the intervening 10 years tremendous advances in the field of cardiac computed tomography have occurred. We now can legitimately claim that computed tomography angiography (CTA) of the coronary arteries is available. In the evaluation of patients with suspected coronary artery disease (CAD), many guidelines today consider CTA an alternative to stress testing. The use of CTA in primary prevention patients is more controversial in considering diagnostic test interpretation in populations with a low prevalence to disease. However the nuclear technique most frequently used by cardiologists is myocardial perfusion imaging (MPI). The combination of a nuclear camera with CTA allows for the attainment of coronary anatomic, cardiac function and MPI from one piece of equipment. PET/SPECT cameras can now assess perfusion, function, and metabolism. Assessing cardiac viability is now fairly routine with these enhancements to cardiac imaging. This issue is full of important information that every cardiologist needs to now.
