United States Code United States,2008 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.

Food Chemistry H.-D. Belitz,Werner Grosch,Peter Schieberle,2009-01-15 For more than two decades, this work has remained the leading advanced textbook and easy-to-use reference on food chemistry and technology. Its fourth edition has been extensively re-written and enlarged, now also covering topics such as BSE detection or acrylamide. Food allergies, alcoholic drinks, or phytosterols are now treated more extensively. Proven features of the prior editions are maintained: Contains more than 600 tables, almost 500 figures, and about 1100 structural formulae of food components - Logically organized according to food constituents and commodities - Comprehensive subject index. These features provide students and researchers in food science, food technology, agricultural chemistry and nutrition with in-depth insight into food chemistry and technology. They also make the book a valuable on-the-job reference for chemists, food chemists, food technologists, engineers, biochemists, nutritionists, and analytical chemists in food and agricultural research, food industry, nutrition, food control, and service laboratories. From reviews of the first edition Few books on food chemistry treat the subject as exhaustively...researchers will find it to be a useful source of information. It is easy to read and the material is systematically presented. JACS

The Art of Antiquity John K. Papadopoulos,Piet De Jong,2007 The archives of the American School excavations in the Athenian Agora contain a remarkable series of watercolors and drawings - well over 400 - by Piet de Jong, one of the best-known, most distinctive, and influential archaeological illustrators of the 20th century. They show landscapes, people, and, above all, objects recovered during many seasons of fieldwork at one of the longest continuously running archaeological projects in Greece.The aim of this volume is to bring these illustrations out of the storage drawers and to assemble in color a representative sample of some of the finest of Piet de Jong's contributions. Along the way, this book tells the story of the Agora excavations and assesses their contribution to scholarship. It includes essays by 16 scholars currently working at the Agora, and surveys the entire span of the material they are studying - from Neolithic pottery to the Late Byzantine and post-Byzantine frescoes from the Church of Ayios Spyridon.
