Harmonising EU Competition Litigation Maria Bergström,Marios Iacovides,Magnus Strand,2016-01-14 This volume in the Swedish Studies in European Law series, produced by the Swedish Network for European Legal Studies, heralds the new harmonised regime of private enforcement of EU competition law. In 2013, the Commission issued a Communication and Practical Guide to the quantification of harm in antitrust litigation and a Recommendation on collective redress. In 2014, the long-awaited Directive on actions for damages for infringements of EU competition law was finally adopted. In 2016, the Commission is expected to issue guidelines on the passing-on of overcharges. This book examines these recent developments and offers the perspectives of judges, officials, practitioners and academics. With a preface by Judge Carl Wetter of the General Court, the book explores five different themes. In section one, the main policy issues and challenges are presented. In section two, the new regime is placed in the bigger picture of recent EU law developments. In section three, the nexus between private enforcement and transparency is investigated. A comparative perspective is offered in section four by looking into private enforcement in five Member State jurisdictions. Finally, issues relating to causation, harm and indirect purchasers are explored in section five.

Bronze Age Settlement and Land-Use in Thy, Northwest Denmark (Volume 1 & 2) Jens-Henrik Bech,Kristian Kristiansen,Berit Valentin Eriksen,2018-06-04 This two volume monograph about the region of Thy in the early Bronze Age provides a high resolution archaeological and ecological model of the organisation of landscape, settlements and households during the period 1500-1100 BC. Bordering the North Sea to the west, and the calmer waters of the Limfjord to the east, the region of Thy in Denmark experienced four centuries of intense economic and demographic expansion. By combining results from environmental and economic research (pollen and palaeo-botanical analyses) with intensive field surveys and excavations of farmsteads with exceptional preservation, it has been possible to open a window to the changes that transformed Bronze Age society and its environment during a few centuries of exceptional expansion and wealth consumption. The results from this interdisciplinary venture made it possible to link together the histories of local farmsteads with the wider regional and global history of the Bronze Age in North-western Europe during this period. Here is much to feed on for

students and researchers of the Bronze Age alike.
